Charles Hirschman,2016-08-31 Today over 75 percent of high school seniors aspire to graduate from college However only one third of Americans hold a bachelor s degree and college graduation rates vary significantly by race ethnicity and parental socioeconomic status If most young adults aspire to obtain a college degree why are these disparities so great In From High School to College Charles Hirschman analyzes the period between leaving high school and completing college for nearly 10 000 public and private school students across the Pacific Northwest Hirschman finds that although there are few gender racial or immigration related disparities in students aspirations to attend and complete college certain groups succeed at the highest rates For example he finds that women achieve better high school grades and report receiving more support and encouragement from family peers and educators They tend to outperform men in terms of preparing for college enrolling in college within a year of finishing high school and completing a degree Similarly second generation immigrants are better prepared for college than first generation immigrants in part because they do not have to face language barriers or learn how to navigate the American educational system Hirschman also documents that racial disparities in college graduation rates remain stark In his sample 35 percent of white students graduated from college within seven years of completing high school compared to only 19 percent of black students and 18 percent of Hispanic students Students socioeconomic origins including parental education and employment home ownership and family structure account for most of the college graduation gap between disadvantaged minorities and white students Further while a few Asian ethnic groups have achieved college completion rates on par with whites such as Chinese and Koreans others whose socioeconomic origins more resemble those of black and Hispanic students such as Filipinos and Cambodians also lag behind in preparedness enrollment and graduation from college With a growing number of young adults seeking college degrees understanding the barriers that different students encounter provides vital information for social scientists and educators From High School to College illuminates how gender immigration and ethnicity influence the path to college graduation **Who Goes to America's**

Highly Ranked "national" Universities? Jeffrey A. Owings,Timothy Madigan,Bruce Daniel,1998 *Clinician's Guide To Neuropsychological Assessment* Rodney D. Vanderploeg,2014-04-04 Neuropsychological assessment is a difficult and complicated process Often experienced clinicians as well as trainees and students gloss over fundamental problems or fail to consider potential sources of error Since formal test data on the surface appear unambiguous and objective they may fall into the habit of overemphasizing tests and their scores and underemphasizing all the factors that affect the validity reliability

and interpretability of test data But interpretation is far from straightforward and a pragmatic application of assessment results requires attention to a multitude of issues This long awaited updated and greatly expanded second edition of the Clinician s Guide to Neuropsychological Assessment like the first focuses on the clinical practice of neuropsychology Orienting readers to the entire multitude of issues it guides them step by step through evaluation and helps them avoid common misconceptions mistakes and methodological pitfalls It is divided into three sections fundamental elements of the assessment process special issues settings and populations and new approaches and methodologies The authors all of whom are actively engaged in the clinical practice of neuropsychological assessment as well as in teaching and research do an outstanding job of integrating the academic and the practical The Clinician s Guide to Neuropsychological Assessment Second Edition will be welcomed as a text for graduate courses but also as an invaluable hands on handbook for interns postdoctoral fellows and experienced neuropsychologists alike No other book offers its combination of breadth across batteries and approaches depth and practicality

Normal Instructor and Teachers World ,1928 Educational Attainment, 2000 Kurt Bauman,Nikki L. Graf,2003 **Trouble at the Bar** Clifford Winston,David Burk,Jia Yan,2021-03-02 Deregulating the legal profession will benefit society by improving access to legal services and the efficacy of public policies Lawyers dominate a judicial system that has come under fire for limiting access to its services to primarily the most affluent members of society Lawyers also have a pervasive influence throughout other parts of government This is the first book offering a critical comprehensive overview of the legal profession s role in failing to serve the majority of the public and in contributing to the formation of inefficient public policies that reduce public welfare In Trouble at the Bar the authors use an economic approach to provide empirical support for legal reformers who are concerned about their own profession The authors highlight the adverse effects of the legal profession s self regulation which raises the cost of legal education decreases the supply of lawyers and limits the public s access to justice to the point where in general only certified lawyers can execute even simple contracts At the same time barriers to entry that limit competition create a closed environment that inhibits valid approaches to analyzing and solving legal problems that are at the heart of effective public policy Deregulating the legal profession the authors argue would allow more people to provide a variety of legal services without jeopardizing their quality reduce the cost of those services spur competition and innovation in the private sector and increase the quality of lawyers who pursue careers in the public sector Legal practitioners would enjoy more fulfilling careers and society in general and its most vulnerable members in particular would benefit greatly
