Extended Curriculum Programmes Tennyson Mgutshini, 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector

Afterimages of Apartheid Kylie Thomas, 2025-10-29 Afterimages of Apartheid shows how photographs of the past can be mobilised as a critical tool for understanding the ongoing effects of apartheid in contemporary South Africa Through close readings of significant images made during and after apartheid the book shows how photography works as a means of documentation commemoration and resistance Written by one of South Africa's leading scholars of visual history the book considers the ways in which photographs can be used to contest impunity for state violence Afterimages includes chapters on the Sharpeville and Marikana massacres on the re opening of cases of human rights violations that remain unresolved in the aftermath of the South African Truth and Reconciliation Commission and on contemporary protests against the post apartheid state The book

makes a powerful case for the role of photographs in drawing the viewer into the past time they represent issuing a call to the living to remember respond and react This vivid account of the photography of apartheid will be of interest to students and researchers across the fields of South African history visual studies memory studies art history photography studies and transitional justice *Impact of Immigration and Xenophobia on Development in Africa* Mafukata, Mavhungu

Abel,2020-12-25 Human movement has an influence on the socio economic dynamics of people regions and countries The schisms between host and immigrants impact how host countries utilize immigrant skills and expertise to benefit their economies However immigrants are impacted by negative diplomatic relations between countries that limit the free movement of people and the welfare of immigrants In association this brings about social challenges such as Afrophobia racism xenophobia hatred and violence within these countries While these challenges are deeply rooted across the world Africa has its own unique challenges Still struggling with massive underdevelopment Africa needs to remove all the negative factors that could impede its quest of achieving development imperatives *Impact of Immigration and Xenophobia on Development in Africa* analyzes the genesis and evolution of immigration in Africa and how this has resulted in social challenges such as xenophobia within the continent The book focuses on demonstrating how immigrant skills and expertise can be positively utilized to assist African development and asserts the existence of xenophobia in respective countries does not assist Africa s quest of resolving its own challenges The chapters within this book therefore explore how this subsequent output of xenophobia has impacted African development and focuses on the revival of Pan Africanism as a uniting instrument and ideology for Africans This book is a valuable reference tool for activists retired and practicing politicians governments policymakers practitioners stakeholders researchers students and academicians **ICCWS 2016 11th International**

Social cohesion in Gauteng Richard Ballard, Christian Hamann, Kate Joseph, Thembani Mkhize, 2019-03-14 Increasing attacks on foreigners including in April 2015 along with a succession of widely publicised incidents of racism have triggered a new round of soul searching in South Africa Why after the comprehensive defeat of apartheid and its ideology does prejudice seem so intractable What kinds of interventions could help reduce these troubling events How can society be made more cohesive Suggestions about what to do in the face of these challenges are sometimes speculative and wishful They consist of appeals to the better nature of ordinary people or an assumption that the feel good moments of the democratic transition can be re enacted to bind everyone together Calls for social cohesion and tolerance seem often to dodge the complex vicious cycles that lead to the instances of intolerance that erupt in the media or in communities This Research Report centres on better understanding the current dynamics of social cohesion in Gauteng It tackles five guiding questions each of which corresponds to a chapter 1 How has social cohesion become a goal in post apartheid South Africa and what are the key limitations resulting from this understanding of social progress 2 In a global context how is social cohesion defined and what are the main contestations about this ideal of social change 3 How do the respondents in the GCRO s Quality of Life IV 2015 16 survey respond to questions on levels of trust claims to belonging by different race groups and the place of migrants and gays and lesbians in Gauteng 4 How have past and present initiatives to improve social cohesion conceived of the problem they are attempting to address and what is their scale of intervention 5 What are the various methodologies that have been used in past and present initiatives to improve social cohesion A key premise of this research was that our society has an enormous accumulation of experience in trying to tackle anti social interactions and to address social injustices that are in various ways shaped by race class nationality gender sexuality and other identities The last two chapters of this report are based on a review of more than 60 social cohesion initiatives They analyse the wide variety of actors involved in such work the different ways in which they conceive of their objectives and the different scales at which they operate These actors pursue dozens of different methodologies including sports and dialogue arts psychology urban design and public campaigns This dispersed capacity through society is important because it represents experience based responses to the ways in which anti social behaviour and social injustice are reproduced In attempting to determine a programme of action we argue that we should learn from and extend existing and past attempts to tackle these difficulties

The Role of Ecosystem Services in Sustainable Food Systems Leonard Rusinamhodzi,2019-11-12 The Role of Ecosystem Services in Sustainable Food Systems reveals in simple

terms the operational definition concepts and applications of ecosystem services with a focus on sustainable food systems The book presents case studies on both geographical and production system wide considerations Initial chapters discuss concepts methodologies and the tools needed to understand ecosystem services in the broader food system Middle and later chapters present different perspectives from case studies of ecosystem services derived from some of the key sustainable food production systems used by farmers along with discussions on the challenges of deriving full benefits and how they can be overcome Researchers students scientists development practitioners and policymakers will welcome this reference as they continue their work related to sustainable food systems Introduces the concept of ecosystem services in simple terms for a wide readership Provides an explanation of sustainable food systems Contains the tools to identify and quantify ecosystem services in sustainable food systems Identifies ecosystem services in specific systems utilized for sustainable food systems Categorizes the challenges of deriving maximum benefits of ecosystem services Urban Inclusivity in Southern Africa Hangwelani H. Magidimisha-Chipungu, Lovemore Chipungu, 2021-09-28 This book's point of departure rests on the premises that dimensions of the mainstream inclusive city discourse fail to capture in detail vulnerable clusters of society being women children and the aging the minority clusters i.e. the blind the disabled and migrants In addition it fails to recognize the increase of spatial inequality driven by racial and class differences a factor that has seen an increase in community violence and protests The focus on spatial inequality has for a long time blindfolded urban authorities to ignore exclusion arising out of the same environments created with a notion of creating inclusivity Hence this book collapses spatial walls as it seeks to uncover the true perspectives of inclusivity in cities beyond spatial dimensions but within social realms The depth of this book's enquiry rests on its critical investigation of Southern African cities through historical epochs of apartheid and colonialism in the region The Urban Political Theresa Enright, Ugo Rossi, 2017-11-01 This book examines the political and economic trajectories of cities following the 2008 financial crisis The authors claim that in this era which they dub late neoliberalism urban spaces institutions subjectivities and organizational forms are undergoing processes of radical transformation and recomposition The volume deftly argues that the urban political horizon of late neoliberalism is ambivalent marked by many progressive mobilizations for equality and justice but also by regressive forces of austerity exploitation and domination *Phytoremediation* Lee Newman, Abid Ali Ansari, Sarvajeet Singh Gill, M. Naeem, Ritu Gill, 2023-02-13 The accumulation of large amounts of contaminants occurs in the environment due to industrialization and various other anthropogenic activities Contaminants ultimately affect human health worldwide Organic inorganic and radioactive substances are the prevalent forms of environmental contaminants and their complete remediation in soils and sediments is rather a difficult task Concerns of their toxicities led to the emphasis on development of effective techniques to assess the presence and mobility of contaminants in air water and soil Furthermore the ever increasing concentration of toxic pollutants in the environment is considered a serious threat to plant animal human and environmental health Many

technologies are in use to clean and eliminate hazardous contaminants from the environment however these technologies can be costly labor intensive and often distressing to the general public Phytoremediation is a simple cost effective environmentally friendly and fast emerging new technology for eliminating toxic contaminants from different environments Phytoremediation refers to the natural ability of certain plants and their associated microbiome including hyper accumulators or bio accumulators to remove degrade or render contaminants harmless Through this technique certain species of plants flourish by accumulating contaminants present in the environment The unique and selective uptake capabilities of plant root and shoot systems effective translocation bioaccumulation and contaminant degradation capabilities of the accumulator plants are utilized in phytoremediation techniques Phytotechnologies involving the use of plants for contaminant removal gained importance during the last two decades and phytoremediation technology became an effective tool for environmental detoxification because of plants ability to accumulate the contaminants at very high concentrations Phytoremediation strategies can remove degrade or stabilize inorganic and organic contaminants entering a multitude of ecosystems using green plants and their associated microbial communities The development and use of phytotechnologies continues to move forward at a steady pace Researchers recognize the potential of phytoremediation to offer a green cost effective eco friendly and feasible application to address some of the world s many environmental challenges This book provides significant information to add to the previous volumes published on the topic and can serve as the foundation for the development of new applications that feature the integration of modern research discoveries into new methods to remediate contaminated ecosystems Moreover this volume brings recent and established knowledge on different aspects of phytoremediation and nano phytoremediation providing this information in a single source that offers a cutting edge synthesis of scientific and experiential knowledge on polluted environments that is useful for policy makers practitioners and scientists and engineers Phytoremediation Management of Environmental Contaminants Volume 7 highlights the various prospects that are involved in current global phytoremediation research This book delivers a content rich source to the reader and can act as a platform for further research studies It should meet the needs of all researchers working in or have an interest in this particular field
