Enhancing Food Production System Resilience for Food Security Facing a Changing Environment Liming Ye,Ping Zhu,2023-11-28 As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system s productive capacity of food has played a key role in global food provision

Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world. On the other hand, however, the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change, air pollution to land degradation. Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate. It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved. Drum, 2007. African Language Media, Phillip Mpofu, Israel A. Fadipe, Thulani Tshabangu, 2023-03-13. This book outlines how African language media is affected by politics, technology, culture and the economy and how this media is creatively produced and appropriated by audiences across cultures and contexts. African language media can be considered as a tool for communication, socialization and community that defines the various identities of indigenous people in Africa. This book shows how vernacular media outlets, including radio and television as well as native formats such as festivals, rituals and dance, can be used to influence all facets of local people's experience and understanding of community. The book also explores the relationship between African language media sources and contemporary issues, including the digitalization conundrum, peace and conflict resolution, identity formation, hate speech and fake news. Furthermore, it shows how local media can be used for development communication purposes during health and environmental crises. The book includes case studies demonstrating the uses, experiences and activities related to various forms of media available in African languages.

This book will be of interest to scholars in the field of communication and media studies health and environmental communication journalism African studies and anthropology
