Practical Applications of Medical Geology Malcolm Siegel, Olle Selinus, Robert Finkelman, 2021-08-01 This edited volume provides a framework for integrating methods and information drawn from geological and medical sciences and provides case studies in medical geology to illustrate the usefulness of this framework for crafting environmental and public health policies related to natural materials. The relevance of medical geology research to policy decisions is a topic rarely discussed and this volume attempts to be a unique source for researchers and policy makers in the field of medical geology in addressing this gap in practical medical geology applications. The book's four sections establish this framework in detail using risk assessment case studies, data analyses and specific medical geology techniques. Following an introduction to medical geology in the context of risk assessment and risk management, the second section discusses specific methods used in medical geology in the categories of geoscience, biomedicine and data sources. The third section discusses the medical geology of natural materials, energy use and environmental and workplace impacts. This section includes specific case studies in medical geology and describes how the methods and data from the previous section are used in a medical geology analysis. The fourth section includes a guide to the medical geology literature and provides some examples of medical geology programs in Asia and Africa.

Frontiers in Quantum Methods and Applications in Chemistry and Physics M.A.C. Nascimento, Jean Maruani, Erkki J. Brändas, Gerardo Delgado-Barrio, 2015-04-02 This edited multi-author volume contains 14 selected peer-reviewed contributions based on the presentations given at the 18th International Workshop on Quantum Systems in Chemistry, Physics and Biology (QSCP XVIII) held at Casa da Cultura de Paraty, Rio de Janeiro, Brazil, in December 2013. It is divided into several sections written by leaders in the respective fields of quantum methodology applied to atomic, molecular and condensed matter systems, each containing the most relevant material based on related topics. Recent advances and state-of-the-art developments in the quantum theory of atomic, molecular and condensed matter systems, including bio and nano structures, are presented.

ICCWS 2015 10th International Conference on Cyber Warfare and Security Jannie Zaaiman, Louise Leenan, 2015-02-24 These Proceedings are the work of researchers contributing to the 10th International Conference on Cyber Warfare and Security (ICCWS 2015) co-hosted this year by the University of Venda and The Council for Scientific and Industrial Research. The conference is being held at the Kruger National Park, South Africa, on the 24-25 March 2015. The Conference Chair is Dr Jannie Zaaiman from the University of Venda, South Africa, and the Programme Chair is Dr Louise Leenan from the Council for Scientific and Industrial Research, South Africa.

Advanced Two-Dimensional Nanomaterials for Environmental and Sensing Applications Peter R. Makgwane, Naveen Kumar, David E. Motaung, 2024-12-24 Advanced Two-Dimensional Nanomaterials for Environmental and Sensing Applications provides state-of-the-art progress developments in the design strategies of 2D-based nanomaterials. It covers specific focused applications in respective environmental challenges posed by pollutants such as chemical gases, bacterial and microbial, textile dyes.

pharmaceutical antibiotics agricultural pesticides and toxic heavy metals in water and air contaminations It elaborates the applications of 2D nanomaterials in the context of technologies such as sensing and detection to monitor pollutants as well as photocatalysis and adsorption for the removal of pollutants Features Elaborates the applications of 2D nanomaterials in the context of sensing and detection to monitor pollutants as well as photocatalysis and adsorption for the removal of pollutants Focuses on environmental pollutants detection removal or remediation and monitoring device fabrications Discusses materials of specific dimension 2D Covers both water and air remediation Includes photocatalytic degradations and antimicrobial disinfection This book is aimed at graduate students and researchers in chemical and civil engineering materials science and nanomaterials Current Topics in the Utilization of Clay in Industrial and Medical Applications

Mansoor Zoveidavianpoor,2018 Clay and clay minerals have always been used since the ancient times for making ceramic materials and also as a building material Over the past decades there has been a growing trend in their applicability in different areas such as industries environmental remediation and water treatment sectors The growing trend is mainly associated with the fact that they are chemically and mechanically stable have higher specific surface area and cation exchange capacity Furthermore clays can be modified to improve their functionalities in different sectors In this chapter we present a review of the structural mineralogical and chemical properties of clay and the effect of surface modification in their structures We further looked at their applicability in arsenic and fluoride removal in their raw and also in their modified form Although the literature showed that modified clay minerals yields higher adsorption capacity as compared to raw clays little nothing has been reported yet in relation to the cost of modifying clays with chemical species As such new studies should also elaborate on the cost effectiveness of modifying clay minerals with chemical species *Proceedings of the International*

Conference on Education Research Reza Hosseini, **Research in Chemistry Education** Liliana Mammìno,Jan Apotheker,2021-05-17 This volume emphasizes the role of chemical education for development and in particular for sustainable development in Africa by sharing experiences among specialists across the African continent and with specialists from other continents It considers all areas and levels of chemistry education gives specific attention to known major challenges and encourages explorations of novel approaches The chapters in this book describe new teaching approaches approach explorations and in class activities analyse educational challenges and possible ways of addressing them and explore cross discipline possibilities and their potential benefits for chemistry education This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide **Handbook of Research on the Global**

View of Open Access and Scholarly Communications Alemneh, Daniel Gelaw,2022-04-29 In an information and knowledge society access to information and knowledge is a basic human right making equitable and fair access to information and knowledge paramount Open Access OA plays a huge role in addressing inequities as well as broad based and inclusive scientific progress On the surface the number of publications discussing OA issues from various angles are on the

rise However what is missing is a comprehensive assessment of the extent of OA implementation and a discussion of how to proceed in integrating OA issues from various perspectives The Handbook of Research on the Global View of Open Access and Scholarly Communications articulates OA concepts and issues while demystifying the state of the art knowledge domain in the areas of OA and scholarly communications from diverse perspectives as well as implications for the information and knowledge society Covering topics such as ethics copyright challenges and open access initiatives this book is a dynamic resource for publishers librarians higher education administrators policymakers students and educators of higher education researchers and academicians

3D Printing: Application in Medical Surgery E-Book Georgios Tsoulfas,Petros I. Bangeas,Jasjit S. Suri,2019-11-28 Recent advances and technologies in 3D printing have improved and expanded applications for surgery biomedical engineering and nanotechnology In this concise new title Drs Georgios Tsoulfas Petros I Bangeas and Jasjit S Suri synthesize state of the art information on 3D printing and provide guidance on the optimal application in today s surgical practice from evaluation of the technology to virtual reality and future opportunities Discusses challenges opportunities and limitations of 3D printing in the field of surgery Covers patient and surgical education ethics and intellectual property quality and safety 3D printing as it relates to nanotechnology tissue engineering virtual augmented reality and more Consolidates today s available information on this burgeoning topic into a single convenient resource

Applications of STEM (Science, Technology, Engineering and Mathematics) Tools in Microbiology of Infectious Diseases Julio Alvarez,Andres Perez,2017-06-02 Epidemiology is a discipline intended to systematically investigate and ideally quantify disease dynamics in populations Perez 2015 Epidemiological assessments may be divided into four large areas namely a identification and characterization of a pathogen b development of systems for detection of cases c descriptive epidemiology and quantification of disease patterns and d advanced analytical methods to design intervention strategies Briefly there is an initial need for understanding the pathogeny of a disease and condition which may also include experimental studies and development of new models of infection and proliferation under different conditions Subsequently such knowledge may be applied to support the identification of cases which typically includes the design evaluation and validation of diagnostic tests Disease may then be quantified in a population leading to the identification of patterns and application of molecular characterization techniques to understand disease spread and ultimately to identify factors preventing or promoting disease Finally those factors may be incorporated into advanced quantitative methods and epidemiological models which are used to design and evaluate strategies aimed at preventing controlling or eliminating disease in the population Recent years have seen a dramatic increase in the application of science technology engineering and mathematical STEM tools and approaches intended to enhance such analytical epidemiology process with the ultimate goal of supporting disease prevention control and eradication This eBook comprises a series of research articles that through current state of the art scientific knowledge on the application of STEM tools to the microbiology of infectious diseases demonstrate their usefulness at the various

components of an integral epidemiological approach divided into the four large components of a experimental studies b novel diagnostic techniques c epidemiological characterization and d population modeling and intervention

Crowdsourcing: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2019-05-03 With the growth of information technology many new communication channels and platforms have emerged This growth has advanced the work of crowdsourcing allowing individuals and companies in various industries to coordinate efforts on different levels and in different areas Providing new and unique sources of knowledge outside organizations enables innovation and shapes competitive advantage Crowdsourcing Concepts Methodologies Tools and Applications is a collection of innovative research on the methods and applications of crowdsourcing in business operations and management science healthcare education and politics Highlighting a range of topics such as crowd computing macrotasking and observational crowdsourcing this multi volume book is ideally designed for business executives professionals policymakers academicians and researchers interested in all aspects of crowdsourcing

International Environments and Practices of Higher Education Andrea Caputo,Deborah Lock,Dieu Hack-Polay,2022-10-31 This book provides a critical review of the teaching practices in higher education in international contexts Sticky problems and debates about inclusivity diversity and cultural representation in the curriculum and classroom are explored through the eyes of the academics who negotiate complex teaching landscapes

Global Development of the Community College Model Carmen L. McCrink,Heidi Whitford,Natasha C. Stubbs,2017-03-13 While the community college is a longstanding institutional type within the U S the success of this model has recently garnered international attention As countries outside the U S grapple with issues regarding access and affordability of higher education opportunity the concept of the community college has gained traction This issue explores The global expansion and development of the community college model in various countries and regions around the world Insights into the establishment and sustainability of these institutions in other countries through research and analysis and Case studies that focus on the development and implementation process of community colleges amid various social political and economic contexts This is the 177th volume of this Jossey Bass quarterly report series Essential to the professional libraries of presidents vice presidents deans and other leaders in today s open door institutions New Directions for Community Colleges provides expert guidance in meeting the challenges of their distinctive and expanding educational mission

Current Microbiological Research in Africa Akebe Luther King Abia,Guy R. Lanza,2020-02-04 Scientific output in low and middle income countries is greatly challenged by numerous factors This is particularly pronounced in sub Saharan African countries despite the continent being the world s second largest and second most populous continent currently undergoing rapid economic growth Financial constraints and unclear areas of focus when funding is available are among the limiting factors with the consequence being the development of inadequate policies especially those relating to environmental protection and conservation This 13 chapter book is a unique piece in the field of microbiology designed to stimulate some research areas in

Africa by illustrating interesting and informative examples of the current applied research agenda in environmental microbiology in selected countries within the continent With authors from the North South East and West of Africa the book touches diverse applied methods and approaches to meet the pragmatic needs faced by environmental microbiologists in Africa Also included are topics on viruses bacteria including cyanobacteria and protozoa and their importance in disease Sustainable agriculture and aquaculture and eco friendly oil and hydrocarbon bioremediation and degradation approaches are highlighted Microbial involvement in different common indoor e g household kitchens latrines and hospitals and outdoor settings including air soil and water habitats and their resistance to commonly used antibiotics are described Hopefully the work presented here will stimulate the need for increasing modern training and funding initiatives to prepare African microbiologists to meet the challenges they face in African universities and research laboratories

Cereal Grains Aakash K. Goyal, 2021-12-08 Over the past 50 years cereals such as maize rice wheat sorghum and barley have emerged as rapidly evolving crops because of new technologies and advances in agronomy breeding biotechnology genetics and so on Population growth and climate change have led to new challenges among which are feeding the growing global population and mitigating adverse effects on the environment One way to deal with these issues is through sustainable cereal production This book discusses ways to achieve sustainable production of cereals via agronomy breeding transcriptomics proteomics and metabolomics Chapters review research examine challenges and present prospects in the field This volume is an excellent resource for students researchers and scientists interested in and working in the area of sustainable crop production

Fig (Ficus carica): Production, Processing, and Properties Mohamed Fawzy Ramadan, 2023-02-20 This book creates a multidisciplinary forum of discussion on *Ficus carica* with particular emphasis on its horticulture post harvest marketability phytochemistry extraction protocols biochemistry nutritional value functionality health promoting properties ethnomedicinal applications technology and processing The impact of traditional and innovative processing on the recovery of high added value compounds from *Ficus carica* byproducts is extensively reported Also the text discusses the potential applications of *Ficus carica* in food cosmetics and pharmaceutical products Fig *Ficus carica* Production Processing and Properties illustrates a diversity of developments in food science and horticultural research including Production processing chemistry and functional properties of *Ficus carica* *Ficus carica* phytochemicals and its health promoting effects Food non food and technological applications of *Ficus carica* Recent research focuses on studying the bioactive compounds and therapeutic traits and investigating the mode of action and toxicological impacts of medical plant extracts and bioactive phytochemicals *Ficus carica* is of significant importance due to its widespread food industrial and medicinal applications Although *Ficus carica* products are already commercially available in the international market it is hard to find a reference work covering the production processing chemistry and properties of *Ficus carica* This book will be the first publication focusing specifically on this important topic

Frontiers in Computational Chemistry: Volume 1 Zaheer Ul-Haq, Jeffry D. Madura, 2015-12-14

Frontiers in Computational Chemistry originally published by Bentham and now distributed by Elsevier presents the latest research findings and methods in the diverse field of computational chemistry focusing on molecular modeling techniques used in drug discovery and the drug development process This includes computer aided molecular design drug discovery and development lead generation lead optimization database management computer and molecular graphics and the development of new computational methods or efficient algorithms for the simulation of chemical phenomena including analyses of biological activity In Volume 1 the leading researchers in the field have collected eight different perspectives in the application of computational methods towards drug design to provide an up to date rendering of the current field This volume covers a variety of topics from G protein coupled receptors to the use of cheminformatics and bioinformatics computational tools such as Molecular Mechanics Poisson Boltzmann Surface Area protein protein interactions the use of computational methods on large biological data sets various computational methods used to identify pharmaceutically relevant targets and more Brings together a wide range of research into a single collection to help researchers keep up with new methods Uniquely focuses on computational chemistry approaches that can accelerate drug design Makes a solid connection between experiment and computation and the novel application of computational methods in the fields of biology chemistry biochemistry physics and biophysics with particular focus on the integration of computational methods with experimental data *Inorganic Chemistry, Polymer Chemistry, and Solid State Chemistry Editor's Pick 2024* Luís D.

Carlos,Elena Vladimirovna Boldyreva,Pellegrino Musto,2025-01-23 We are pleased to introduce the collection Frontiers in Chemistry Inorganic Chemistry Polymer Chemistry and Solid State Chemistry Editor s Pick 2024 This collection showcases the most well received spontaneous articles from the past couple of years and has been specially handpicked by our Chief Editors The work presented here highlights the broad diversity of research performed across the sections and aims to put a spotlight on the main areas of interest All research presented here displays strong advances in theory experiment and methodology with applications to compelling problems This collection aims to further support Frontiers strong community by recognizing highly deserving authors **Advanced Processes for Wastewater Treatment and Water Reuse** Rui C.

Martins,Rosa M. Quinta-Ferreira,Maria Graca Rasteiro,Renato Falcão Dantas,Marta Gmurek,2021-01-05 **Examining Information Literacy in Academic Libraries** Chizwina, Sabelo,Moyo, Mathew,2024-04-09 In the 21st century information literacy emerges as the cornerstone of educational development Despite its paramount significance a stark reality persists students often traverse the corridors of academia without acquiring essential information literacy skills This deficiency is exacerbated by a shortage of faculty training leaving academic libraries to shoulder the responsibility of cultivating information savvy individuals Examining Information Literacy in Academic Libraries delves into the core challenges and solutions surrounding this critical educational imperative This book illuminates the role of academic libraries as bastions of information literacy instruction The capacity of students and information consumers to seek evaluate and utilize information

is paramount for informed decision making ethically and legally Regardless of whether or not students were brought up in the digital age many lack the fundamental information literacy skills required for higher education This deficiency manifests in academic malpractices such as plagiarism which compromise the integrity of educational institutions Moreover this imperative work contends that the Fourth Industrial Revolution 4IR is not a distant concept but a present reality The recent global upheaval caused by the Coronavirus pandemic accelerated the adoption of new technologies necessitating a swift reassessment of our collective ability to navigate this everchanging digital and information landscape Focusing on media literacy data literacy and digital literacy with information literacy as the overarching domain this book serves as a beacon for educators librarians and policymakers
