Social Engineering Robert W. Gehl, Sean T. Lawson, 2022-03-08 Manipulative communication from early twentieth century propaganda to today s online con artistry examined through the lens of social engineering The United States is awash in manipulated information about everything from election results to the effectiveness of medical treatments Corporate social media is an especially good channel for manipulative communication with Facebook a particularly willing vehicle for it In Social Engineering Robert Gehl and Sean Lawson show that online misinformation has its roots in earlier techniques mass social engineering of the early twentieth century and interpersonal hacker social engineering of the 1970s

converging today into what they call masspersonal social engineering As Gehl and Lawson trace contemporary manipulative communication back to earlier forms of social engineering possibilities for amelioration become clearer The authors show how specific manipulative communication practices are a mixture of information gathering deception and truth indifferent statements all with the instrumental goal of getting people to take actions the social engineer wants them to Yet the term fake news they claim reduces everything to a true false binary that fails to encompass the complexity of manipulative communication or to map onto many of its practices They pay special attention to concepts and terms used by hacker social engineers including the hacker concept of bullshitting which the authors describe as a truth indifferent mix of deception accuracy and sociability They conclude with recommendations for how society can undermine masspersonal social engineering and move toward healthier democratic deliberation

The Language of Cyber Attacks Aaron Mauro,2024-09-05 Many cyberattacks begin with a lure a seemingly innocent message designed to establish trust with a target to obtain sensitive information or compromise a computer system The perils of clicking an unknown link or divulging sensitive information via email are well known so why do we continue to fall prey to these malicious messages This groundbreaking book examines the rhetoric of deception through the lure asking where its all too human allure comes from and suggesting ways in which we can protect ourselves online Examining practices and tools such as phishing ransomware and clickbait this book uses case studies of notorious cyberattacks by both cyber criminals and nation states on organizations such Facebook Google and the US Department of Defence and in depth computational analyses of the messages themselves to unpack the rhetoric of cyberattacks In doing so it helps us to understand the small but crucial moments of indecision that pervade one of the most common forms of written communication

Reinvent Your Personal Safety Matt Tamas, 2017-10-03 In *Reinvent Your Personal Safety* Matt Tamas takes women through a proactive approach to personal safety, one that isn't about honing technical moves or perfecting technique but more about showing them how to work with their own body and mind, considering realistic scenarios and training them to take appropriate action. Matt's job as a personal safety coach is to not only give women the tools to fight back during an assault but also to help them prevent themselves from being assaulted in the first place. The right action to take is often in advance of a likely violent encounter in order to avoid it altogether. The best way to protect one's self is avoiding the situation in which she is forced to defend herself. *Reinvent Your Personal Safety* talks about the different ways this is possible as well as about the best way to handle one's self when violent confrontation simply cannot be avoided. This is for the high school girl, for the grandmother, for the young professional, for the working mother, anyone who is willing to overcome their limiting beliefs about what they're capable of and key into what self-protection is really about. In reality, knowledge of the appropriate action to take in any given situation is worth scores more than athleticism.
