Unodc World Drug Report 2007:

The ^AWorld Heroin Market Letizia Paoli,Victoria A. Greenfield,Peter Reuter,2009-04-10 This book is the first attempt to describe and analyze the world opiate market It looks at how the Taliban achieved a cutback in heroin production in Afghanistan a longtime goal of national and international drug policy agencies and how that cutback impacted the very robust global market for the drug Based on this and other country studies the authors show that internationally supported interventions on the supply side can open up limited opportunities for curbing consumption **The Ethno-Narcotic**

Politics of the Shan People Thitiwut Boonyawongwiwat,2017-11-15 This book proposes the alternative explanation on the pattern of ethnic conflict especially the on going civil war in Myanmar Previously most scholars accepted that narcotics play the crucial role in conflict as the resource of revenues However this book dramatically changes what we have ever thought before It investigated in both field and documentary research by examining the role of narcotics in the ideological formation process and ethnic identification process Consequently the so called ethno narcotic politics was found in the way that the role of narcotics was able to be used as the source of political mobilization in various ways Furthermore the borderland is the appropriated area where the process of anti ethno narcotics identification could be emerged and later used as the main identity for the ethnic groups who remain fighting against state s power The Oxford Handbook of Global Drug History

Paul Gootenberg,2022 This landmark collection of essays by thirty five historians working on a global scale brings together the latest knowledge and perspectives about the long origins and transformations of today s illicit drugs such as cannabis heroin and cocaine *National Security Cultures* Emil J. Kirchner,James Sperling,2010-07-12 This edited collection examines changes in national security culture in the wake of international events that have threatened regional or global order and analyses the effects of these divergent responses on international security Tracing the links between national security cultures and preferred forms of security governance the work provides a systematic account of perceived security threats and the preferred methods of response with individual chapters on Canada China France Germany Italy Japan Mexico Russia UK and USA Each chapter is written to a common template exploring the role of national security cultures in shaping national responses to the four domains of security governance prevention assurance protection and compellence The volume provides an analytically coherent framework evaluating whether cooperation in security governance is likely to increase among major states and if so the extent to which this will follow either regional or global arrangements By combining a theoretical framework with strong comparative case studies this volume contributes to the ongoing reconceptualization of security and definition of threat and provides a basis for reaching tentative conclusions about the prospects for global and regional security governance in the early 21st century This makes it ideal reading for all students and policymakers with an interest in global security and comparative foreign and security policy **Issues of Governance, Security, and**

Development in Contemporary Africa Mohamed Saliou Camara,Alem Hailu,Sabella O. Abidde,2023-12-15 Governance

security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development **Encyclopedia of Social Work** ,1965
