*Resources in Education*, 1997      **The Complex and Dynamic Language Practices of Emergent Bilinguals**

Mileidis Gort, 2018-10-18 This expanded edition of the International Multilingual Research Journal's recent special issue on translanguaging or the dynamic normative language practices of bilinguals presents a powerful comprehensive volume on current scholarship on this topic. Translanguaging can be understood from multiple perspectives. From a sociolinguistic point of view, it describes the flexible language practices of bilingual communities. From a pedagogical one, it describes strategic and complementary approaches to teaching and learning through which teachers build bridges between the everyday language practices of bilinguals and the language practices and performances desired in formal school settings. *The Complex and Dynamic Language Practices of Emergent Bilinguals* explores the pedagogical possibilities and challenges of translanguaging practice and pedagogy across a variety of U.S. educational programs that serve language minoritized emergent bilingual children and illustrates the affordances of dynamic multilingual learning contexts in expanding emergent bilingual children's linguistic repertoires and supporting their participation in formalized school-based language performances that socialize them into the discourses of schooling. Taken together, the chapters in this volume examine the dynamic interactions and complex language ideologies of bilinguals including pre- and in-service teachers, preK-12 students, and other members of multilingual and multidialectal sociolinguistic communities throughout the United States as they language fluidly and flexibly and challenge the marginalization of these normative bilingual practices in academic settings and beyond. The articles in this book were originally published in the International Multilingual Research Journal.

Benjamin Kinsella, 2020-09-25 Based on a multi-year ethnography in one Spanish-speaking community in New Jersey, this book is a meticulous account of six Mexican families that explores the relationship between siblings' language use patterns, practices, and ideologies. Combining insights gained from language socialization and heritage language studies within the larger field of sociolinguistics, the book's findings examine siblings' sociolinguistic environments and the ways in which these Latino children use and view their multilingual resources in the home, school, and broader community. This study emphasizes the links between siblings' language ideologies, agentive decision-making, and linguistic patterns and the ways in which birth order influences the different dimensions of heritage language maintenance in the U.S.      **Book Talk** Sherry

Multicultural Literature for Latino Bilingual Children Ellen Riojas Clark, Belinda Bustos Flores, Howard L. Smith, Daniel Alejandro González, 2015-11-25 While there are volumes that fall into the category of children's literature there appears to be relatively few that explore the needs

of bilingual learners and the linguistic and sociocultural context of Latino children's literature. This volume makes a needed contribution by addressing the social, cultural, academic, and linguistic needs of Latino bilingual learners who are still underserved through current school practices. We aim to conceptualize different forms of social knowledge so that they can serve as cultural resources for learning, acquiring knowledge, and transforming self and identity. This volume presents a balance of theory, research, and practice that speak to authentic multicultural Latino literature and helps ensure its availability for all students. The intended outcome of this volume then is to create a heightened awareness of the cultural and linguistic capital held by the Latino community to increase Latino students' social capital through the design of critical pedagogical practices and for the formulation of a new perspective that of Latino multicultural literature for children.
