- **Unbalanced Force**- a force or group of forces that push more on one side of an object than the other and causes a change in its motion.

BIG
THE idea

Invisible forces cause every object in the known universe to be in constant motion.

GOALS

#1: I will be able to determine when an object is moving by comparing it to its background or to another object.

#2: I will be able to describe an object's motion and change in position over time.

#3: I will be able to determine an object's speed by dividing the distance traveled by the time taken to travel that distance.

#4: I will be able to make and interpret distance time graphs.

#5: I will be able to identify situations where potential energy is turned into kinetic energy.

#6: I will be able to describe how forces like gravity affect the motion of all objects in the universe.

Performance Task:

At the end of this unit you will build a model roller coaster and be expected to describe how each of the following forces are involved in moving a marble down its track; *inertia, friction, acceleration, gravity, potential energy and kinetic energy.*
(Oh yeah, the marble has to stay on the track!)
