## Reimagining the Biogeochemical Cycles

**Task:** The APES Cartoon Co. has been declining in sales over the last few months. Kids are bored with their products, which they deem were created with a "teacher lens". For example, the cartoon (see picture) reads like a textbook image; there is nothing fun or interesting about!

### Biogeochemical Cycles

In a last ditch effort to save the company they have decided to hire a team of young, hip cartoonists, and given them the task of creating a series of comic strips that depict the different biogeochemical cycles in a fun and creative way.

You, as a highly informed, creative artist and scientist are a member of the team.

### Requirements:

- The biogeochemical cycles that will be present in your team's final product are: hydrologic, carbon, nitrogen, phosphorous, and sulfur. You and your team must choose 3 of these cycles to include.
- Your team of artists will be responsible for creating a series of comic strips that depicts how the cycle works.
- Each comic strip should:
  - Be composed of at least 7 frames or 3-4 pages. These do not have to be all the same size or shape.
  - Include storytelling elements (*a setting, characters, rising action, a conflict, a resolution*)
