

The background of the slide shows a group of people, likely students or professionals, sitting around a table. They are engaged in a collaborative activity, with some looking at papers and others at a laptop. The scene is slightly blurred, emphasizing the text overlay. The text is written in a bold, dark blue font and is arranged in four lines, with the word 'literacy' highlighted by a red rectangular background.

Study Guide For Information Literacy:

Concise Guide to Information Literacy Scott Lanning, 2017-03-27 This concise but information packed text helps high school students in upper grade levels and lower division college and university students quickly master the basics of information literacy. A student's textbook and an instructional reference for educators, the second edition of *Concise Guide to Information Literacy* is both. It teaches students what information literacy is and why it is an important skill to develop for their schoolwork as well as for success in life outside of school. The guide covers major areas in the information literacy process including locating, evaluating, and applying information successfully. It also gives professors, teachers, and librarians a flexible text that can serve as the basis of a course in information literacy or research skills, a basic research guide for any information literacy course, or a supplemental text. This second edition has been reorganized for greater ease of use based on the information literacy models consulted. All chapters have been fully updated and now include extended coverage of the topics that appeared in the first edition; additionally, a new chapter on managing information has been added.

The Good Study Guide Andrew Northedge, 2005-01-01 Developing your learning skills is one of the best investments you can make. We all need to be lifelong learners now. Whether you are an experienced student or just starting out, this book will stimulate, guide, and support you. It will make you think about yourself and how your mind learns. And it will change forever the way that you study. Topics include motivating yourself and managing your time, taking full advantage of your computer, reading with concentration and understanding, developing flexible note-taking strategies, getting the most from seminars and workshops, making presentations, researching online, handling numbers and charts with confidence, writing clear, well-argued assignments, doing yourself justice in exams. 100% Information Literacy Success Terry Taylor, Joan Arth, 2007 This textbook, the fourth entry in the 100% Success series, introduces students to the foundational concepts of information literacy as described by the American Library Association. It empowers students to become information literate and prepares them for information seeking in the workplace. The six chapters offer a step-by-step guide to defining an information need, finding, accessing, and evaluating information, and navigating through the legal, ethical, and communication dynamics of information seeking. To facilitate the learning process, each chapter features learning objectives, a practical scenario, reflection questions, critical thinking questions, individual and group activities, self-assessment, and references. The periodic hints and questions to ask boxes encourage critical thinking. Many of the scenarios, questions, and activities involve workplace situations germane to the student's field of study, emphasizing the importance of information literacy for lifelong learning. The online companion features quizzes and web resources to complement each chapter. Well-organized, easy to read, and comprehensive, this practical guide is highly recommended for those teaching college-level information literacy.

Information Literacy Susie Andretta, 2005-01-31 Taking an international approach, this book explores two main models of Information Literacy or IL: the SCONUL Society of College, National, and University Libraries

Seven Pillars of Information Skills and the IL competencies identified by the ALA American Library Association Practical examples for the development of IL skills identified by these models are illustrated using printed and web based resources The process of integrating IL provision within a programme of study is outlined to illustrate two strategies underpinning this integration at generic skills level the plug play approach and at subject specific level the research skills approach A range of diagnostic and assessment methods to monitor the iterative process of IL skills development are also presented within these frameworks Explores practical applications of two major IL models Explores strategies to integrate IL provision in a multi disciplinary environment Illustrates the developments of independent learning skills through examples taken from different levels of provision at course level and from different levels of competences at user level Introduction to Information Literacy for Students Michael C. Clinical Informatics Study Guide John T. Finnell, Brian E. Dixon, 2015-11-09 This book provides content that arms clinicians with the core knowledge and competencies necessary to be effective informatics leaders in health care organizations. The content is drawn from the areas recognized by the American Council on Graduate Medical Education (ACGME) as necessary to prepare physicians to become Board Certified in Clinical Informatics. Clinical informaticians transform health care by analyzing, designing, selecting, implementing, managing, and evaluating information and communication technologies (ICT) that enhance individual and population health outcomes, improve patient care processes, and strengthen the clinician-patient relationship. As the specialty grows, the content in this book covers areas useful to nurses, pharmacists, and information science graduate students in clinical health informatics programs. These core competencies for clinical informatics are needed by all those who lead and manage ICT in health organizations, and there are likely to be future professional certifications that require the content in this text.
