Petersen,2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room s central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed The importance of learning how to use these classrooms well and to capitalize on their special features is paramount The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces **English Literature & Literary Criticism, a Practical Guide to Systematic Reading & Study ...** James Baldwin,1882 **Gale Researcher Guide for: Nature and Romanticism in the Poetry of William Cullen Bryant** Andrew Galloway, Gale Researcher Guide for Nature and Romanticism in the Poetry of William

Death is a sensitive subject for most people. Whether due to fear or superstition, many individuals avoid the topic of mortality. For teens, the subject is taboo as well. Most young adults believe that death won't affect them, so they'd rather not talk about it. But death is a natural course of life, and everyone, including teens, will encounter it at some time in their lives, some sooner than later and some unexpectedly. In *Dealing with Death: The Ultimate Teen Guide*, Kathlyn Gay addresses this difficult subject, providing matter-of-fact discussions on a number of issues that help teens better understand the nature of mortality. This book looks at the personal, legal, and moral questions related to death, including: How do you deal with the death of a loved one? What's it like to live with a terminal illness? What happens after you die? Featuring real stories and quotes from teens about their experiences, this book shows young adults a variety of views on dying and grieving. This book will help readers deal with death, not only the reality that death is inevitable for all of us, but also the many ways people face death and bereavement. *Dealing with Death* serves as a valuable resource for all teens, whether they are dealing with tragedy or just looking for more information on a tough subject.
