Study Guide For What Darwin Never Knew:

Assessing Schools for Generation R (Responsibility) Michael P. Mueller, Deborah J. Tippins, Arthur J. Stewart, 2013-07-17 Today's youth will face global environmental changes as well as complex personal and social challenges. To address these issues, this collection of essays provides vital insights on how science education can be designed to better engage students and help them solve important problems in the world around them. **Assessing Schools for Generation R Responsibility** includes theories, research, and practices for envisioning how science and environmental education can promote personal, social, and civic responsibility. It brings together inspiring stories, creative practices, and theoretical work to make the case that science education can be reformed so that students learn to meaningfully apply the concepts they learn in science classes across America and grow into civically engaged citizens. The book calls for a curriculum that equips students with the knowledge, skills, attitudes, and values to confront the complex and often ill-defined socioscientific issues of daily life. The authors are all experienced educators and top experts in the fields of science and environmental education, ecology, experiential education, educational philosophy, policy, and history. They examine what has to happen in the domains of teacher preparation and public education to effect a transition of the youth of America. This exciting, informative, sophisticated, and sometimes provocative book will stimulate much debate about the future direction of science education in America and the rest of the world. It is ideal reading for all school superintendents, deans, faculty, and policymakers looking for a way to implement a curriculum that helps build students into responsible and engaged citizens.

Darwin Loves You George Levine, 2008-03-10 Jesus and Darwin do battle on car bumpers across America Medallions of fish symbolizing Jesus are answered by ones of amphibians stamped Darwin and stickers proclaiming Jesus Loves You are countered by Darwin Loves You The bumper sticker debate might be trivial and the pronouncement that Darwin Loves You may seem merely ironic but George Levine insists that the message contains an unintended truth In fact he argues we can read it straight Darwin Levine shows saw a world from which his theory had banished transcendence as still lovable and enchanted and we can see it like that too if we look at his writings and life in a new way Although Darwin could find sublimity even in ants or worms the word Darwinian has largely been taken to signify a disenchanting world driven by chance and heartless competition Countering the pervasive view that the facts of Darwin's world must lead to a disenchanting vision of it

Levine shows that Darwin's ideas and the language of his books offer an alternative form of enchantment a world rich with meaning and value and more wonderful and beautiful than ever before Without minimizing or sentimentalizing the harsh qualities of life governed by natural selection and without deifying Darwin Levine makes a moving case for an enchanted secularism a commitment to the value of the natural world and the human striving to understand it

British Medical Journal ,1874 **In Darwin's Shadow** Michael Shermer,2002-08-15 Virtually unknown today Alfred Russel Wallace was the co discoverer of natural selection with Charles Darwin and an eminent scientist who stood out among his Victorian peers as a man of formidable mind and equally outsized personality Now Michael Shermer rescues Wallace from the shadow of Darwin in this landmark biography Here we see Wallace as perhaps the greatest naturalist of his age spending years in remote jungles collecting astounding quantities of specimens writing thoughtfully and with bemused detachment at his reception in places where no white man had ever gone Here too is his supple and forceful intelligence at work grappling with such arcane problems as the bright coloration of caterpillars or shaping his 1858 paper on natural selection that prompted Darwin to publish with Wallace the first paper outlining the theory of evolution Shermer also shows that Wallace's self trained intellect while powerful also embraced surprisingly naive ideas such as his deep interest in the study of spiritual manifestations and seances Shermer shows that the same iconoclastic outlook that led him to overturn scientific orthodoxy as he worked in relative isolation also led him to embrace irrational beliefs and thus tarnish his reputation As author of *Why People Believe Weird Things* and founding publisher of *Skeptic* magazine Shermer is an authority on why people embrace the irrational Now he turns his keen judgment and incisive analysis to Wallace's life and his contradictory beliefs restoring a leading figure in the rise of modern science to his rightful place
