Jones, John H. Lawton, 2012-12-06 I was asked to introduce this volume by examining why a knowledge of ecosys tem functioning can

contribute to understanding species activities dynamics and assemblages I have found it surprisingly difficult to address this topic On the one hand the answer is very simple and general because all species live in ecosystems they are part of and dependent on ecosystem processes It is impossible to understand the abundance and distribution of populations and the species diversity and composition of communities without a knowledge of their abiotic and biotic environments and of the fluxes of energy and matter through the ecosystems of which they are a part But everyone knows this It is what ecology is all about e g Likens 1992 It is why the discipline has retained its integrity and thrived despite a sometimes distressing degree of bickering and chauvinism among its various subdisciplines physiological behavioral population community and ecosystem ecology

Mathematical Ecology Thomas G. Hallam, Simon A. Levin, 2012-12-06 There is probably no more appropriate location to hold a course on mathematical ecology than Italy the country of Vito Volterra a founding father of the subject The Trieste 1982 Autumn Course on Mathematical Ecology consisted of four weeks of very concentrated scholasticism and aestheticism The first weeks were devoted to fundamentals and principles of mathematical ecology A nucleus of the material from the lectures presented during this period constitutes this book The final week and a half of the Course was apportioned to the Trieste Research Conference on Mathematical Ecology whose proceedings have been published as Volume 54 Lecture Notes in Biomathematics Springer Verlag The objectives of the first portion of the course were ambitious and probably unattainable Basic principles of the areas of physiological population community and ecosystem ecology that have solid ecological and mathematical foundations were to be presented Classical terminology was to be introduced important fundamental topics were to be developed some past and some current problems of interest were to be presented and directions for possible research were to be provided Due to time constraints the coverage could not be encyclopedic many areas covered already have merited treatises of book length Consequently preliminary foundation material was covered in some detail but subject overviews and area syntheses were represented when research frontiers were being discussed These lecture notes reflect this course philosophy
