Earth's Magnetic Field

1. Is Earth's magnetic north pole at its geographic north pole? Explain.
 - Earth's magnetic north pole is actually geographically south. This explains why the north pole of the compass is attracted to geographic north.
2. How does a compass respond when it is placed in the magnetic field of a bar magnet?
 - The compass will be attracted or repelled by the magnet depending on which pole it is facing.
3. What is the cause of Earth's magnetism?
 - Earth's magnetism is the result of its liquid iron-nickel outer core.
4. Why does a compass point north? What polarity is the North Pole?
 - A compass will point north because it is attracted to the south pole of earth's magnetic field. The geographic north pole is actually a south magnetic pole.
5. What is magnetic declination?
 - Magnetic declination is the angular difference between the magnetic north and geographic north from that location.
6. What has happened to the strength and location of Earth's magnetic field in the past?
 - The magnetic field has reversed several times in Earth's history. The field has also weakened on occasion.
7. Suppose Earth's magnetic field were to change so it looks like the picture to the right. If you stand at the marked point, in which direction will your compass needle point? What is the approximate magnetic declination at this point?
