

Comprehensive Guide to NAUI Open Water Scuba Diving Certification

NAUI Open Water Elearning

Certification and Physical Fitness

1. Your entry-level NAUI Scuba Diver certification is a 'license to learn'.
2. Physical fitness is an important consideration for scuba divers because it helps to prevent diving accidents due to exhaustion.
3. Completing this entry-level scuba certification course makes you knowledgeable and skillful enough to dive safely in open water with conditions similar to those in which you were trained.
4. Factors that can make you incapable of sustaining efforts sometimes demanded when participating in recreational diving include inadequate sleep, recent head cold, and recent ingestion of drugs.

Equipment Care and Selection

1. Diving equipment should be rinsed thoroughly, dried, and stored in a cool place.
2. Open heel fins are usually the fins of choice for scuba divers because they may be used in a wide variety of environmental conditions.
3. Factors that can affect the breathing ease of a snorkel are length and diameter.
4. When selecting a face mask, the most important thing to consider is proper seal and fit.
5. Snorkels over 15 inches in length are not recommended primarily because they have too much dead air space.
6. When buying or renting equipment for diving, the most important consideration is the fit on your body.
7. Hydrostatic and visual inspection standards are different around the world, so it is important to consult your local NAUI facility to learn about the regulations in your area.
8. Engraved markings on scuba tanks include the date of hydrostatic test, serial number, and type of material.
9. Scuba tanks are typically made of aluminum.
10. You should have your regulator serviced by a certified repair technician as recommended by the manufacturer.
11. The stage of the regulator which reduces working tank pressure to intermediate pressure is the first stage.
12. The lubber line is the direction of travel line on the compass.
13. When rinsing a regulator, it is best to leave the regulator attached to the tank or have the dust cap in place.
