Bernice Z. Schacter,1999-12-30 Recent advances in biotechnology in areas as diverse as agriculture the environment food
and healthcare have led to much debate and media attention This unique reference resource for advanced high school
students and teachers explores the science behind these new technologies and examines the stakeholders and their stakes in
the various debates The author presents views of scientists doctors insurance companies and big businesses among others on
such issues as genetic testing patenting of human gene sequences cloning and genetically engineered food Each chapter
addresses a specific issue with the goals of helping readers understand all the different ways biotechnology is being explored
and implemented in our lives today as well as to critically perceive the arguments being made concerning these issues
Students will learn there is more to biotechnology than cloning sheep that it is also used for such purposes as making cheese
and beer Each topic is presented as a Case Study describing of a range of technologies and a diversity of stakeholders that
will allow users to draw their own conclusions This introduction to the technologies and the debates surrounding them also
encourages students to take advantage of the many available sources for further research particularly on the Internet
