Microeconomics Gary W. Yohe, Margaret Southwood, 1992 Capital in the History of Accounting and Economic Thought Jacques Richard, Alexandre Rambaud, 2021-11-29 Starting with the first scientific economists such as Cantillon 1755 and Quesnay 1758 and ending with Piketty 2019 this book explores the treatment of the concept of capital in the history of accounting and economic thought The work provides a rare juxtaposition of the reasoning discourse and writings of accountants and economists With regard to capital this approach highlights the ongoing struggle between these uncongenial twins as Kenneth Boulding put it for primacy in analysing and utilising capitalism But if they are certainly uncongenial the book also argues that it is wrong to ever classify these two disciplines as twins because they have taken very different paths ever since scientism came to dominate in economics and ethical and moral considerations were put to one side This book will be of significant interest to readers to history of economic thought critical accounting and heterodox economics Climate Change isn't Everything Mike Hulme, 2023-06-13 The changing climate poses serious dangers to human and non human life alike though perhaps the most urgent danger is one we hear very little about the rise of climatism Too many social political and ecological problems facing the world today from the Russian invasion of Ukraine to the management of wildfires quickly become climatized explained with reference to a change in the climate When complex political and ethical challenges are so narrowly framed arresting climate change is sold as the supreme political challenge of our time and everything else becomes subservient to this one goal In this far sighted analysis Mike Hulme reveals how climatism has taken hold in recent years becoming so pervasive and embedded in public life that it is increasingly hard to resist it without being written off as a climate denier He confronts this dangerously myopic view that reduces the condition of the world to the fate of global temperature or the atmospheric concentration of carbon dioxide to the detriment of tackling serious issues as varied as poverty liberty biodiversity loss inequality and international diplomacy We must not live as though climate alone determines our present and our future **The Principles of Economics Course** Phillip Saunders, 1990 **Recording for the Blind & Dyslexic, ... Catalog of Books** , 1996 **John Stuart Mill's Political Philosophy** John R. Fitzpatrick, 2006-06-15 In the aftermath of the terrorist attacks of September 11 2001 the philosophy of John Stuart Mill has never been more relevant Can we reconcile individual liberty with the demands of the common good John Fitzpatrick argues that properly understood Mill s liberal utilitarianism can indeed support a system of rights rich enough to guarantee individual liberty Combining fresh interpretations of Mill s writings on ethics politics and political economy with the historical Mill that can found in his autobiography the book will be of substantial interest to a wide audience Material Participation: Technology, the Environment and Everyday Publics N. Marres, 2012-07-30 This book develops a fresh perspective on everyday forms of engagement one that foregrounds the role of objects technologies and settings in democracy Examining a range of devices

from smart meters to eco homes the book sets out new concepts and methods for analyzing the relations between participation innovation and the environment Australian National Bibliography ,1993
