Enhancing Digital Literacy and Creativity is an exploration of how young children gain digital literacies in makerspaces. The international authors investigate how hands-on experimentation with a variety of materials from traditional arts and crafts to contemporary digital tools like 3D printers and laser cutters can aid children in their development of play, creativity, and storytelling. From museums to libraries, nursery schools to community centres, this research shows how making supports the development of creative skills and introduces concepts to be explored in a variety of environments and contexts. Drawing on examples from around the globe described by a range of international academics, *Enhancing Digital Literacy and Creativity* includes chapters on Virtual reality, Museum and library makerspaces, Intergenerational making in families, Making in schools and nursery settings, Assessing learning in makerspaces, Links to previous theories, Social imagination. This book will be a valuable resource for students and researchers in the fields of education and digital literacies, early childhood, teacher educators and practitioners, librarians, museum educators, and makerspace staff.
