

5-1 Study Guide and Intervention

Bisectors of Triangles

Perpendicular Bisectors A perpendicular bisector is a line, segment, or ray that is perpendicular to the given segment and passes through its midpoint. Some theorems deal with perpendicular bisectors.

Perpendicular Bisector Theorem	If a point is on the perpendicular bisector of a segment, then it is equidistant from the endpoints of the segment.
Converse of Perpendicular Bisector Theorem	If a point is equidistant from the endpoints of a segment, then it is on the perpendicular bisector of the segment.
Circumcenter Theorem	The perpendicular bisectors of the sides of a triangle intersect at a point called the circumcenter that is equidistant from the vertices of the triangle.

Example 1: Find the measure of \overline{FM} .

\overline{FK} is the perpendicular bisector of \overline{GM} .
 $FG = FM$
 $2.8 = FM$

Example 2: \overline{BD} is the perpendicular bisector of \overline{AC} . Find x .

$$\begin{aligned} AD &= DC \\ 3x + 8 &= 5x - 6 \\ 14 &= 2x \\ 7 &= x \end{aligned}$$

Exercises:

Find each measure.

1. XW

2. BF

Point P is the circumcenter of $\triangle EMK$. List any segment(s) congruent to each segment below.

3. $\overline{MP} \rightarrow \overline{PE}$

4. $\overline{KP} \rightarrow \overline{PE}$

5. $\overline{MP} \rightarrow \overline{PK}$

6. $\overline{EP} \rightarrow \overline{PK}$

Study Guide Intervention Geometry

**Nikolaos Tsetsos, Marios

Second Edition [by] John P. Dworetzky Stephen D. Cooper, Stephen S. Cooper, 1985 **Textbook of Catheter-Based Cardiovascular Interventions** Peter Lanzer, 2018-04-30 This book is a fully updated and revised second edition of a highly successful text in which a new concept of knowledge mining based on explication and transfer of interventional knowledge of experts has been implemented The dedicated training program that is set out will serve the needs of all interventional operators whether cardiologists vascular surgeons vascular specialists or radiologists enabling them to achieve a consistent expert level across the entire broad spectrum of catheter based interventions Operator skills and in particular decision making and strategic skills are the most critical factors for the outcome of catheter based cardiovascular interventions Currently such skills are commonly developed by the empirical trial and error method only The explicit teaching training and learning approach adopted in this book permits the rapid transfer of interventional knowledge and enables individual operators to negotiate steep learning curves and acquire complex skills in a highly efficient manner It will thereby offer invaluable assistance in meeting successfully the challenges of modern cardiovascular care *Algebra 1 Chapter 9 Resource Masters* McGraw-Hill Staff, 2002-04 [Algebra 1 Chapter 12 Resource Masters](#) McGraw-Hill Staff, 2002-04

Patient-Specific Modeling of the Cardiovascular System Roy C.P. Kerckhoffs, 2010-09-03 Peter Hunter Computational physiology for the cardiovascular system is entering a new and exciting phase of clinical application Biophysically based models of the human heart and circulation based on patient specific anatomy but also informed by population atlases and incorporating a great deal of mechanistic understanding at the cell tissue and organ levels offer the prospect of evidence based diagnosis and treatment of cardiovascular disease The clinical value of patient specific modeling is well illustrated in application areas where model based interpretation of clinical images allows a more precise analysis of disease processes than can otherwise be achieved For example Chap 6 in this volume by Speelman et al deals with the very difficult problem of trying to predict whether and when an abdominal aortic aneurysm might burst This requires automated segmentation of the vascular geometry from magnetic resonance images and finite element analysis of wall stress using large deformation elasticity theory applied to the geometric model created from the segmentation The time varying normal and shear stress acting on the arterial wall is estimated from the arterial pressure and flow distributions Thrombus formation is identified as a potentially important contributor to changed material properties of the arterial wall Understanding how the wall adapts and remodels its material properties in the face of changes in both the stress loading and blood constituents associated with infl
