What Is Your Favorite Flavor?

Read the following paragraphs, and complete the exercises below.

The word *chromatography*, which describes a process for separating parts of a mixture, comes from the Greek words for “color writing.” Chromatography was originally used to separate colored plant pigments. Today, many industries use chromatography to separate mixtures.

HOW CHROMATOGRAPHY SAVES MONEY

Thanks to chromatography, foods with a greater variety of flavors are now available at a lower cost. In the past, all foods were flavored with natural compounds derived from plants. However, this process is often expensive, and supplies of the necessary plants are limited. Today, many of the chemical compounds that make up these flavorings are produced in the laboratory.

TESTING COMPLEX FLAVORINGS AND FRAGRANCES IN THE LAB

Some flavorings, such as the compound benzaldehyde—which is the flavoring of wild cherry—are fairly easy to make. However, creating flavorings that are made of many compounds is much more difficult. More than 100 compounds are sometimes found in a single flavoring! Researchers use gas chromatography to determine what compounds are in some flavorings so that they can make these flavors in the lab.

The same process is used to create artificial fragrances. In many cases, the synthetic compound is identical to the natural one, but it is much more affordable. For example, any fragrance that smells like roses contains beta-phenylethyl alcohol. It costs thousands of dollars per kilogram to extract this compound from rose oil, but it can be made in a laboratory for just 1 percent of this cost.

EXERCISES

1. What is chromatography?

2. Explain how gas chromatography helps scientists create complex flavors and fragrances in the laboratory.

3. What are two advantages of using synthetic compounds rather than natural ones for certain flavors and fragrances?

Approaches to Inclusive English Classrooms Kate Mastruserio Reynolds, 2015-03-02 This book provides educators with an accessible guide to best practices concerning content-based instruction (CBI) models and their use in English learner inclusive classrooms. The author effectively bridges the gap between theory and practice with a critical analysis of practical examples and diverse strategies for the inclusion of English learners into K-12 general education courses. The book also raises controversial questions regarding who is qualified to teach English learners and who is responsible for doing so, looking at the difficulties faced by both general educators and ESL teachers in Inclusive Classrooms. By providing a lens through which both ESL teachers and general educators are able to analyze, compare, and contrast a range of widely employed CBI methods, this book allows teachers to make informed decisions in their EL program development and work with English learners in K-12 schools.
