Ashby, Hugh Shercliff, David Cebon, 2023-08-01 Introduction to Materials Science and Engineering A Design Led Approach is ideal for a first course in materials for mechanical civil biomedical aerospace and other engineering disciplines The authors systematic method includes first analyzing and selecting properties to match materials to design through the use of real world case studies and then examining the science behind the material properties to better engage students whose jobs will be centered on design or applied industrial research As with Ashby's other leading texts the book emphasizes visual communication through material property charts and numerous schematics better illustrate the origins of properties their manipulation and fundamental limits Design led approach motivates and engages students in the study of materials science and engineering through real life case studies and illustrative applications Requires a minimum level of math necessary for a first course in Materials Science and Engineering Highly visual full color graphics facilitate understanding of materials concepts and properties Chapters on materials selection and design are integrated with chapters on materials fundamentals enabling students to see how specific fundamentals can be important to the design process Several topics are expanded separately as Guided Learning Units Crystallography Materials Selection in Design Process Selection in Design and Phase Diagrams and Phase Transformations For instructors a solutions manual image bank and other ancillaries are available at <https://educate.elsevier.com/book/details/9780081023990> Molecular Forces and Self Assembly Barry W.

Ninham, Pierandrea Lo Nostro, 2010-04-01 Challenging the cherished notions of colloidal theory Barry Ninham and Pierandrea Lo Nostro confront the scientific lore of molecular forces and colloidal science in an incisive and thought

provoking manner The authors explain the development of these classical theories discussing amongst other topics electrostatic forces in electrolytes specific ion effects and hydrophobic interactions Throughout the book they question assumptions unearth flaws and present new results and ideas From such analysis a qualitative and predictive framework for the field emerges the impact of this is discussed in the latter half of the book through force behaviour in self assembly Here numerous diverse phenomena are explained from surfactants to biological applications all richly illustrated with pertinent intellectually stimulating examples With mathematics kept to a minimum and historic facts and anecdotes woven through the text this is a highly engaging and readable treatment for students and researchers in science and engineering
