Reassessing the Formulary Apportionment Option Richard Krever, 2020-02-20. The Allocation of Multinational Business Income: Reassessing the Formulary Apportionment Option. Edited by Richard Krever. Application of formulary apportionment in specific sectors such as digital enterprises and the banking industry, the political economy of establishing and maintaining a successful formulary apportionment regime, formulary apportionment proposals for Europe, the role of traditional tax criteria such as economic efficiency, fairness, ease of administration and robustness to avoidance and incentive compatibility, determining which parts of a multinational group are included in a formulary apportionment unit and whether innovative profit split methodologies such as those developed by China are shifting traditional arm's length methods to a quasi formulary apportionment system. Providing a comprehensive understanding of all aspects of the formulary apportionment option, this state of the art summary of history, current practice, proposals and prospects in the ongoing debate over arm's length versus formulary apportionment methodologies will be welcomed by practitioners, policy makers and academics concerned with international taxation, all of whom will gain an understanding of the case put forward by proponents for adoption of formulary apportionment in Europe and globally and the counter arguments they face. Readers will acquire a better understanding of the implications of formulary apportionment and its central role in the current debate about the
