are studying cellular processes The labs were designed to help introduce students to many of the major ideas while also
giving them practice with both the scientific method and laboratory tools With these labs we have attempted to give students
enough guidance that they can maneuver through the labs without too much frustration but still have to do some designing of
experiments so that the labs aren't all cookie cutter We also tried to add in some review exercises within the lab to test the
student's ability to go back over what they had just been studying as a form of assessment There are also review questions
that the instructor can use as a quiz or as a study guide for a quiz **Biology 101 Lab Manual** ANONIMO, 2008-01-21
