Japan, 1910-1941 Steven E. Maffeo, 2015-12-16 This unique reference presents 59 biographies of people who were key to the sea services being reasonably prepared to fight the Japanese Empire when the Second World War broke out and whose advanced work proved crucial. These intelligence pioneers invented techniques, procedures, and equipment from scratch, not only allowing the United States to hold its own in the Pacific despite the loss of most of its Fleet at Pearl Harbor but also laying the foundation of today's intelligence methods and agencies. One hundred years ago, in what was clearly an unsophisticated pre-information era, naval intelligence and foreign intelligence in general existed in rudimentary forms almost incomprehensible to us today. Founded in 1882, the U.S. Office of Naval Intelligence (ONI), the modern world's oldest continuously operating intelligence agency, functioned for at least its first forty years with low manning, small budgets, low priority, and no prestige. The navy's early steps into communications intelligence (COMINT), which included activities such as radio interception, radio traffic analysis, and cryptology, came with the 1916 establishment of the Code and Signals Section within the navy's Division of Communications and with the 1924 creation of the Research Desk as part of the Section. Like ONI, this COMINT organization suffered from low budgets, manning, priority, and prestige. The dictionary focuses on these pioneers, many of whom went on even after World War II to important positions in the Navy, the State Department, the Armed Forces Security Agency, the National Security Agency, and the Central Intelligence Agency. It reveals the work and innovations of well and lesser known individuals who created the foundations of today's intelligence apparatus and analysis.

The world of music technology has exploded over the last decades thanks to introductions of new digital formats. At the same time, there has been a renaissance in analog high-fidelity equipment and resurgent interest in turntables, long-playing records, and vintage stereo systems. Music students, collectors, and consumers will appreciate the availability of a guide to all things musical in the technological universe. *Princeton Alumni Weekly*, 1941 **The Navy** Michael R. Häack, 2007-04-23 From the long hours of CTR School in Imperial Beach to gripping ice and snow of Alaska and back down to an isolated military radio station near Malibu, readers will enjoy tales of one man's humorous hitch in the U.S. Navy. His time as a Morse code operator for the Naval Security Group will appeal to any reader's love of history and humor. The rakish life of a young man trusted with confidential military information erupts from the pages as events unfold throughout three years in The Navy.
