Schweinsberg,2006-11-22 Inhaltsangabe Abstract In a time of tightening budgets rising bankruptcies and heightened job insecurity all commerce be it a major corporation or simply that of a sole operator must improve its ROI Return On Investment rate in order to ensure its continued sustainability This factor is the key performance indicator KPI for any business The goal of improved ROI becomes all the more difficult when comparing the effectiveness of competing marketing strategies because intangible factors in the purchasing decision such as brand awareness as well as product credibility and

loyalty cannot be easily quantified Even the consumer often has an unconscious preference for one particular product over another In this regard online marketing offers the advantage of the pull principle the user who pulls the information that he she is seeking for directly from the Internet initiates all activities This implies that a relationship is established between the corporation and consumer With 90 percent of all Internet users choosing to access a SE during a given session this first point of contact becomes often decisive in the success or failure for the online marketing concept Nevertheless there is an interdependency between both the attractiveness and the ability to locate a website i e its findability A website s content may be highly interesting and appropriate to the user s needs but it will be condemned to failure if it cannot be correctly sourced i e ranked by a SE Be that as it may every top ranked website will be rejected if content and usability disappoint expectations This report intends to show how Search Engine Optimization SEO can be used in a strategic context as the first part of the lead process SEO highlights the importance of keyword decisions in order to attract customers who secure high conversion rates and thus increase sales be it online or offline The first part of this analysis will explain the technical background of how SEs and keywords work Also there are several influential factors that should be considered when optimizing keywords for one s business such as SE algorithms the SE market the consumer and his position in the buying cycle as well as online competitors These aspects are discussed in the second part of this analysis The final part will present the concept of Online Performance Measurement Management OPMM and demonstrate how Search Engine Marketing SEM can affect a business
