**Poor Numbers** Morten Jerven, 2013-01-24 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity Reliable statistics including estimates of economic growth rates and per capita income are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data The paucity of accurate statistics is not merely a technical problem it has a massive impact on the welfare of citizens in developing countries Where do these statistics originate How accurate are they Poor Numbers is the first analysis of the production and use of African economic development statistics Morten Jerven s

research shows how the statistical capacities of sub Saharan African economies have fallen into disarray The numbers substantially misstate the actual state of affairs As a result scarce resources are misapplied Development policy does not deliver the benefits expected Policymakers attempts to improve the lot of the citizenry are frustrated Donors have no accurate sense of the impact of the aid they supply Jerven s findings from sub Saharan Africa have far reaching implications for aid and development policy As Jerven notes the current catchphrase in the development community is evidence based policy and scholars are applying increasingly sophisticated econometric methods but no statistical techniques can substitute for partial and unreliable data

The Oxfam Poverty Report Kevin Watkins,1995 Fifty years ago the United Nations Charter proclaimed universal rights to shared prosperity peace and security How far has that vision of world citizenship been realised Despite advances in human welfare and technology there is today a growing polarisation between rich and poor One in four of the world s people live in absolute poverty unable to meet their basic needs armed conflict is affecting millions of people and the global environment is under threat Yet there is a failure of political will to address the silent emergency of poverty The Oxfam Poverty Report draws on Oxfam s experience of working in over 70 countries to examine the causes of poverty and conflict It identifies the structural forces which deny people their basic rights and gives a wide range of examples of the ways in which men and women are bringing about positive change at every level from the household to the international arena Oxfam believes that it is time to renew the UN vision of universal basic rights The Report concludes by proposing policy and institutional reforms which would transform international institutions and trading relations and calls for a new commitment to work together to eradicate poverty and bring sustainable peace and security for all the world s people
