*Green Synthesis in Nanomedicine and Human Health* Richard L. K. Glover, Daniel Nyanganyura, Maluta Steven Mufamadi, Rofhiwa Bridget Mulaudzi, 2021-03-09 Green synthesis is an emerging method for deriving nanoparticles present in natural plants for use in nanomedicine. Written by experts in the field, *Green Synthesis in Nanomedicine and Human Health* showcases the exciting developments of this specialty and its potential for promoting human health and well-being. This book gives practical information on novel preparation methods for identifying nanoparticles present in natural plants. It discusses applications of nanoparticles in combating communicable, non-communicable, and vector-borne diseases. It also explores the potential for nanoparticles to combat antimicrobial resistance through improvements in treatment methods, diagnostics, and drug delivery systems. Features scientific evidence of opportunities for integrating indigenous flora into nanomedicine to develop cost-effective therapeutic and diagnostic solutions for diseases including cancer, tuberculosis, malaria, and diabetes. Places green synthesis and nanomedicine in the African orthodox and traditional healthcare context. Provides policymakers with scientific evidence to inform policies for controlling or mitigating dangerous diseases. This book is essential reading for students, scientists, policymakers, and practitioners of nanotechnology and will appeal to anyone with an interest in integrating traditional African healthcare and Western medicine. *Sustainability, Climate Change and the Green Economy*

Nhamo, Godwell, Mjimba, Vuyo, 2017-02-03 Written by 18 authors, this book on Sustainability, Climate Change, and the Green Economy brings together insights at the nexus of the four key concepts embedded in its title. The book is unpacked in six parts. Part 1 is a single chapter that covers the context of the topic. Part 2 looks at the green economy and green jobs and addresses the challenges of government coordination and socio-economic development with emphasis on skills and immigration regimes. Part 3 reflects on sustainable development with a focus on relearning our wants and needs and provides critical reflection on engineering for sustainable development. Management of natural resources and wetlands makes up Part 4, which teases out issues on timber harvesting as well as challenges and opportunities in addressing environment, economic development, and growth conflicts. A critique of climate change coverage in news media, mainstreaming climate change into wildlife policies, and tourism are matters covered in Part 5. The last part, Part 6, is another single chapter which articulates emerging issues from the whole book and presents some policy and take-home messages. Given the growing literature in the field of sustainability, climate change, and the green economy, this piece will prove a must-read for policy makers, academics, industry, and civil society. **Education Across Time and Place** Thomas O'Shea, 2016-05-25 What is mathematics and what aspects of it should be taught in schools? How and to whom should it be taught, and how should its understanding be assessed? These questions continue to drive curriculum development, school organization, teaching methods, and research agendas. No one today doubts that mathematics should be taught in our schools, but this was not always so. *Mathematics Education Across Time and Place*
