

ECON HISTORY NOTES

PRODUCTION

Production Function

Shows relation between inputs in production (i.e. a bundle of resources like labour and capital) and outputs (final goods). Production function and technology is related as to technological change is equivalent to shift in the curve for the production function. The history of technological change is the history of the shift in the curve. These changes are the main source of growth. In the past technology about the production process could be passed from generation to generation with little loss of time.

Development of History

The movement in time through that people follow in search of. The development of the production function over time and the history of growth. Therefore the way people try to combine resources with technology over time.

Production Technology

Refers to the set of production goods in time. There are three types of production goods: natural, human and capital. They are combined in different ways. Natural goods are fixed, human goods are mobile and capital goods are mobile. Therefore, the way people try to combine resources with technology over time is the way people try to combine resources with technology over time.

Stages of Economic Development

Stage 1: Subsistence

In this stage people are only trying to get the necessary goods and services for their survival. They are not trying to get the necessary goods and services for their survival.

Stage 2: Growth

In this stage people are trying to get the necessary goods and services for their survival. They are not trying to get the necessary goods and services for their survival.

Stage 3: Modern

In this stage people are trying to get the necessary goods and services for their survival. They are not trying to get the necessary goods and services for their survival.

Zjc History Questions
