Converging Clinical and Engineering Research on Neurorehabilitation II Jaime Ibáñez,José González-Vargas,José María Azorín,Metin Akay,José Luis Pons,2016-10-12 The book reports on advanced topics in the areas of neurorehabilitation research and practice It focuses on new methods for interfacing the human nervous system with

electronic and mechatronic systems to restore or compensate impaired neural functions. Importantly, the book merges different perspectives such as the clinical neurophysiological and bioengineering ones to promote and encourage collaborations between clinicians, neuroscientists and engineers. Based on the 2016 International Conference on Neurorehabilitation ICNR 2016 held on October 18-21, 2016 in Segovia, Spain, this book covers various aspects of neurorehabilitation research and practice, including new insights into biomechanics, brain physiology, neuroplasticity and brain damages and diseases, as well as innovative methods and technologies for studying and/or recovering brain function from data mining to interface technologies and neuroprosthetics. In this way, it offers a concise yet comprehensive reference guide to neurosurgeons, rehabilitation physicians, neurologists and bioengineers. Moreover, by highlighting current challenges in understanding brain diseases, as well as in the available technologies and their implementation, the book is also expected to foster new collaborations between the different groups, thus stimulating new ideas and research directions.

Senior Design Projects in Mechanical Engineering Yongsheng Ma, Yiming Rong, 2021-11-10. This book offers invaluable insights about the full spectrum of core design course contents systematically and in detail. This book is for instructors and students who are involved in teaching and learning of capstone senior design projects in mechanical engineering. It consists of 17 chapters over 300 illustrations with many real-world student project examples. The main project processes are grouped into three phases: i.e. project scoping and specification, conceptual design, and detail design, and each has dedicated two chapters of process description and report content prescription, respectively. The basic principles and engineering process flow are well applicable for professional development of mechanical design engineers. CAD/CAM/CAE technologies are commonly used within many project examples. Thematic chapters also cover student teamwork organization and evaluation, project management, design standards and regulations, and rubrics of course activity grading. Key criteria of successful course accreditation and graduation attributes are discussed in details. In summary, it is a handy textbook for the capstone design project course in mechanical engineering and an insightful teaching guidebook for engineering design instructors.
