Discrete Event Systems 2004 (WODES'04) Janan Zaytoon, 2005-12-22 Approx 484 pages **NASA Technical Paper**, 1988 **Radiation Effects on Embedded Systems** Raoul Velazco, Pascal Fouillat, Ricardo Reis, 2007-06-19 Radiation Effects on Embedded Systems aims at providing the reader with the major guidelines for coping with radiation effects on components supposed to be included in today's applications devoted to operate in space but also in the atmosphere at high altitude or at ground level It contains a set of chapters based on the tutorials presented at the International School on Effects of Radiation on Embedded Systems for Space Applications SERESSA that was held in Manaus Brazil from 20 to 25 November 2005 This book will provide all IC engineers with useful information regarding outside environmental influences on their designs and is an excellent reference Advanced Techniques in Reliability Model Representation and Solution Daniel L.

Palumbo, 1992 **Applications of the Hybrid Automated Reliability Predictor**, 1988 **Solution of Partial Differential Equations on Vector and Parallel Computers** James M. Ortega, Robert G. Voigt, 1985-01-01 This volume reviews in the context of partial differential equations algorithm development that has been specifically aimed at computers that exhibit some form of parallelism Emphasis is on the solution of PDEs because these are typically the problems that generate high computational demands The authors discuss architectural features of these computers inasmuch as they influence algorithm performance and provide insight into algorithm characteristics that allow effective use of hardware

Parallel Processing and Applied Mathematics Roman Wyrzykowski, Jack Dongarra, Ewa Deelman, Konrad Karczewski, 2018-03-22 The two volume set LNCS 10777 and 10778 constitutes revised selected papers from the 12th International Conference on Parallel Processing and Applied Mathematics PPAM 2017 held in Lublin Poland in September 2017 The 49 regular papers presented in the proceedings were selected from 98 submissions For the workshops and special sessions that were held as integral parts of the PPAM 2017 conference a total of 51 papers was accepted from 75 submissions The papers were organized in topical sections named as follows Part I numerical algorithms and parallel scientific computing particle methods in simulations task based paradigm of parallel computing GPU computing parallel non numerical algorithms performance evaluation of parallel algorithms and applications environments and frameworks for parallel distributed cloud computing applications of parallel computing soft computing with applications and special session on parallel matrix factorizations Part II workshop on models algorithms and methodologies for hybrid parallelism in new HPC systems workshop power and energy aspects of computations PEAC 2017 workshop on scheduling for parallel computing SPC 2017 workshop on language based parallel programming models WLPP 2017 workshop on PGAS programming minisymposium on HPC applications in physical sciences minisymposium on high performance computing interval methods workshop on complex collective systems *IBM SAN and SVC Stretched Cluster and VMware Solution Implementation* Jon Tate, Angelo Bernasconi, Torben Jensen, Ian MacQuarrie, Ole Rasmussen, Matthew Robinson, Steven Tong, IBM

Redbooks,2013-07-28 This IBM Redbooks publication describes the IBM Storage Area Network and IBM SAN Volume Controller Stretched Cluster solution when combined with VMware We describe guidelines settings and implementation steps necessary to achieve a satisfactory implementation Business continuity and continuous application availability are among the top requirements for many organizations today Advances in virtualization storage and networking have made enhanced business continuity possible Information technology solutions can now be designed to manage both planned and unplanned outages and the flexibility and cost efficiencies available from cloud computing models IBM has designed a solution that offers significant functionality for maintaining business continuity in a VMware environment This functionality provides the capability to dynamically move applications across data centers without interruption to those applications The live application mobility across data centers relies on these products and technology The industry proven VMware Metro vMotion IBM System Storage SAN Volume Controller Stretched Cluster solution A Layer 2 IP Network and storage networking infrastructure for high performance traffic management DC interconnect

Reliable Software Technologies - Ada-Europe 2001 Dirk Craeynest,Alfred Strohmeier,2003-06-29 The Sixth International Conference on Reliable Software Technologies Ada Europe 2001 took place in Leuven Belgium May 14 18 2001 It was sponsored by Ada Europe the European federation of national Ada societies in cooperation with ACM SIGAda and it was organized by members of the K U Leuven and Ada Belgium This was the 21st consecutive year of Ada Europe conferences and the sixth year of the conference focusing on the area of reliable software technologies The use of software components in embedded systems is almost ubiquitous planes fly by wire train signalling systems are now computer based mobile phones are digital devices and biological chemical and manufacturing plants are controlled by software to name only a few examples Also other non embedded mission critical systems depend more and more upon software For these products and processes reliability is a key success factor and often a safety critical hard requirement It is well known and has often been experienced that quality cannot be added to software as a mere afterthought This also holds for reliability Moreover the reliability of a system is not due to and cannot be built upon a single technology A wide range of approaches is needed the most difficult issue being their purposeful integration Goals of reliability must be precisely defined and included in the requirements the development process must be controlled to achieve these goals and sound development methods must be used to fulfill these non functional requirements

Large-Scale Distributed Computing and Applications: Models and Trends Cristea, Valentin,Dobre, Ciprian,Stratan, Corina,Pop, Florin,Costan, Alexandru,2010-05-31 Many applications follow the distributed computing paradigm in which parts of the application are executed on different network interconnected computers The extension of these applications in terms of number of users or size has led to an unprecedented increase in

the scale of the infrastructure that supports them Large Scale Distributed Computing and Applications Models and Trends offers a coherent and realistic image of today s research results in large scale distributed systems explains state of the art technological solutions for the main issues regarding large scale distributed systems and presents the benefits of using large scale distributed systems and the development process of scientific and commercial distributed applications

Automated and Autonomous Navigation Powered by GNSS Mauro Cardone,2025-04-25 This book is the result of one year investigation in all the available technologies necessary to build an efficient navigation system usable on rovers moving on the ground and at the sea centered on GNSS Global Navigation Satellite System It is used as instruction note for the calls for tender in the Italian Space Agency It targets the applications of automated and autonomous navigation for the following types of rover trains at level 2 of ERTMS ETCS autonomous cars starting from level 3 of SAE MASS Maritime Autonomous Surface Ships at level 4 of IMO The material is already edited for the using of professionals and engineers who need to build a navigation system on top of COTS hardware The topics cover in a thorough view all the necessary subjects to build an efficient positioning system for the rover enabling coping with all kind of environments and all interferences and always warranting a minimum level of the positioning KPIs reliability availability integrity and accuracy The localization system built according to these guidelines will be ready to be certified and the product will be at TRL 6 i e technology demonstrated in the relevant environment

Artificial Neural Nets and Genetic Algorithms George D. Smith,Nigel C. Steele,Rudolf F. Albrecht,2012-12-06 This is the third in a series of conferences devoted primarily to the theory and applications of artificial neural networks and genetic algorithms The first such event was held in Innsbruck Austria in April 1993 the second in Ales France in April 1995 We are pleased to host the 1997 event in the mediaeval city of Norwich England and to carryon the fine tradition set by its predecessors of providing a relaxed and stimulating environment for both established and emerging researchers working in these and other related fields This series of conferences is unique in recognising the relation between the two main themes of artificial neural networks and genetic algorithms each having its origin in a natural process fundamental to life on earth and each now well established as a paradigm fundamental to continuing technological development through the solution of complex industrial commercial and financial problems This is well illustrated in this volume by the numerous applications of both paradigms to new and challenging problems The third key theme of the series therefore is the integration of both technologies either through the use of the genetic algorithm to construct the most effective network architecture for the problem in hand or more recently

the use of neural networks as approximate fitness functions for a genetic algorithm searching for good solutions in an incomplete solution space i e one for which the fitness is not easily established for every possible solution instance

Information Control Problems in Manufacturing 2004 (2-volume Set) Peter Kopacek, Gerard Morel, Carlos Eduardo Pereira, 2005-08-12 **Proceedings** Symposium on Reliable Distributed Systems 14, 1995, Bad Neuenahr, 1995

Principles of Performance and Reliability Modeling and Evaluation Lance Fiondella, Antonio Puliafito, 2016-04-06 This book presents the latest key research into the performance and reliability aspects of dependable fault tolerant systems and features commentary on the fields studied by Prof Kishor S Trivedi during his distinguished career Analyzing system evaluation as a fundamental tenet in the design of modern systems this book uses performance and dependability as common measures and covers novel ideas methods algorithms techniques and tools for the in depth study of the performance and reliability aspects of dependable fault tolerant systems It identifies the current challenges that designers and practitioners must face in order to ensure the reliability availability and performance of systems with special focus on their dynamic behaviors and dependencies and provides system researchers performance analysts and practitioners with the tools to address these challenges in their work With contributions from Prof Trivedi s former PhD students and collaborators many of whom are internationally recognized experts to honor him on the occasion of his 70th birthday this book serves as a valuable resource for all engineering disciplines including electrical computer civil mechanical and industrial engineering as well as production and manufacturing
