Enhancing Financial Disclosure Standards in Transitional Economies II Radhakrishna Narasimham, 2010-10-01 Public and private investors want timely accurate financial information about institutions before investing This requires adherence to internationally accepted financial disclosure standards However implementing these standards is a particular challenge for economies in transition from the Soviet era central planning approach toward a market economy The Asian Development Bank provided a technical assistance grant TA 6505 REG to build capacity to enhance financial disclosure standards in Armenia Azerbaijan and Georgia The book is a compendium of the project s findings activities results and recommendations It discusses the rationale for the adoption of International Financial Reporting Standards and the enforcement of International Standards on Auditing by legal entities and explores their use by small and medium sized enterprises in the three countries The book is a valuable guide to accountants auditors financial institutions regulators investors governments researchers and others interested in financial disclosure

practices and progress of these transitional nations *Financial Accounting and Management Control* Fredrik Nilsson, Anna-Karin Stockenstr nd, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable information on a company's value creation The aim of management control on the other hand is to give the board senior executives and employees unique information for strategy formulation and implementation One often mentioned negative effect is the risk of financial accounting affecting management control design and use making it less relevant for decision making at the company level The book provides an analysis of the complex relationship between financial accounting and management control The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system An interesting and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book
