Tourism and Citizenship Raoul Bianchi, Marcus Stephenson, 2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate However despite the fact that cross border travel implies certain citizenship rights as well as the material capacity to travel the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel The text weaves its analysis of citizenship and travel in the context of addressing large scale societal transformations engendered by globalization neoliberalism and the geopolitical realignments between states as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves By doing so it focuses on key themes including tourism and social citizenship rights race culture and minority rights states markets and the freedom of movement tourism peace and geo politics consumerism and class and ethical tourism global citizenship and cosmopolitanism The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science The royalties received from this book will be donated to the International Porter Protection Group

Based on a carefully contextualized and critical study this book tells how France's dominant social and political ideology and prevailing cultural conventions abate the effects of race and anxiety within school choice here focused on public school middle class parents living among immigrants in the diverse Paris suburbs The study employs innovative techniques to tackle the presence of race a difficult topic in France and to address the impact of global risk from which social anxiety springs Interviews for this book took place when a wave of deadly terrorism mass migration of refugees and the divisiveness of a presidential election made topics around the study poignant It demonstrates how race operates in French education policy and practices by directing attention to how experienced and more qualified teachers move over their careers to less diverse schools seen by teachers as having better students The book explores how social anxiety created through global risk is culturally resisted within the French context by viewing this resistance theoretically through parental dispositions It presents the racist perception in French school choice by revealing the education policies and parental choices that often segregate immigrants into schools with inexperienced and unqualified teachers This book will be of interest to academics at upper level undergraduate as well as graduate courses policymakers educators who are interested in inequality sociology of education transnational and critical perspectives on race schooling and school choice *The Economics of Immigration* Cynthia

Bansak, Nicole Simpson, Madeline Zavodny, 2015-04-24 Economics of Immigration provides students with the tools needed to examine the economic impact of immigration and immigration policies over the past century. Students will develop an understanding of why and how people migrate across borders and will learn how to analyze the economic causes and effects of immigration. The main objectives of the book are for students to understand the decision to migrate, to understand the impact of immigration on markets and government budgets, and to understand the consequences of immigration policies in a global context. From the first chapter, students will develop an appreciation of the importance of immigration as a separate academic field within labor economics and international economics. Topics covered include the effect of immigration on labor markets, housing markets, international trade, tax revenues, human capital accumulation, and government fiscal balances. The book also considers the impact of immigration on what firms choose to produce and even on the ethnic diversity of restaurants and on financial markets, as well as the theory and evidence on immigrants' economic assimilation. The textbook includes a comparative study of immigration policies in a number of immigrant-receiving and sending countries, beginning with the history of immigration policy in the United States. Finally, the book explores immigration topics that directly affect developing countries, such as remittances, brain drain, human trafficking, and rural-urban internal migration. Readers will also be fully equipped with the tools needed to understand and contribute to policy debates on this controversial topic. This is the first textbook to comprehensively cover the economics of immigration, and it is suitable both for economics students and for students studying migration in other disciplines such as sociology and politics.
