

Module 2

1. Explain the causes of the Second Industrial Revolution in the United States.

It was a period of great economic, social, and political change that accompanied industrialization and urbanization in the United States following the Civil War.

1. National Resources (coal, iron, oil, etc.)
2. Abundant Labor Supply (immigration)
3. Strong Government Policy (Railroad Grants)
4. New Sources of Power (electricity, petroleum, steel)
5. Patents
6. Joint-stock companies, corporations

2. Describe the major events of the Second Industrial Revolution.

Major Technological Advancements: the Second Industrial Revolution: 1870s. Invention: telephone, air brake, and electric trolleys on the railroads. The Bessemer and open hearth processes in the steel mills, the telephone, electric light, and typewriter.

3. Explain how the Second Industrial Revolution shaped various regions of the US.

Northwest

The Northwest was at the center of industrialization during the First Industrial Revolution. It contained the leading industrial regions in the Second Industrial Revolution. New York, Massachusetts, and Pennsylvania produced more than 50 percent of all U.S. industrial products in 1890.

Almost 300,000 miles of railroad lines interconnected in the Northwest by 1890. The growth of railroads created a network of supporting industries. Coal mining, iron and steel, and machinery that were essential to the manufacture of machinery. The steel for use in the railroads and iron and steel manufacturing for the growth of the mining industry in the region.

This rapid growth of a manufacturing economy created a need for specific workers. Cities in the Northwest became industrial centers like the manufacturing hub of the United States. By 1870 about 25 percent of the U.S. population was foreign born. Most of the new immigrants were the immigrants from the immigrant. Most of these immigrants settled in the Northwest and the upper Midwest along the Great Lakes for three years.

The growth of industry also highlighted the gap between rich and poor in the region. Perhaps more than any other, the social, political, and economic differences. Mining and manufacturing created for economic growth. Mining and manufacturing workers and working conditions. Labor unions formed first in the steel industry. Miners and manufacturers were some of the first workers to take their action as a bargaining tool against business owners.

Southwest

The large region experienced economic growth in the mining and manufacturing. The upper Midwest states along the Great Lakes—Ohio, Indiana, and Illinois—became centers of industry and a hub for shipping and commerce. Cities grew rapidly, attracting large numbers of immigrants. Chicago, Illinois became one of the nation's largest cities.

Teaching History Online John F. Lyons, 2008-11-19 Bringing history teaching into the twenty-first century. Teaching History Online is a concise guide to developing and using internet resources in history instruction. It offers practical, jargon-free advice to help the history teacher develop online assignments and provides an informed introduction to the myriad resources and tools available for use in the online classroom. Beginning with a chapter on the benefits of teaching and studying online, John F. Lyons goes on to address instructors' most commonly asked questions and concerns, including designing an online class, providing online alternatives to the lecture, developing a user-friendly discussion board, conducting assessment, and dealing with classroom management issues. For historians interested in providing an online element to their traditional face-to-face classroom teaching, the final chapter shows how to develop successful hybrid/blended classes. An accessible introduction and valuable resource, Teaching History Online includes sample lesson plans, examples of online learning tools, and suggestions for further reading, helping those who use or want to use online resources to create exciting, interactive, and rewarding learning environments. Visit the companion website, which includes extra reading and resources, at www.routledge.com/textbooks/9780415482226.

Jason Stacy, Matthew J. Ellington, 2020-01-28 In 2014, the College Board rolled out a new AP U S History course which centered less on memorizing content and more on developing skills. Since then, the course has been modified here and there, but very little has changed in AP textbooks: content is still king. Until now, *Fabric of a Nation* is the first book to truly embrace this dramatic shift in the AP course and in how history is taught. Built from the ground up by long-time AP leaders Jason Stacy and Matthew Ellington, this book offers a new approach to AP US History by seamlessly integrating a brief historical narrative, AP skills practice, primary source documents, and exact alignment to the AP course.
