Zimsec History Paper1 Nov 2014 A Level Pg1:

New Millennium Woes and Livelihood Struggles in Africa Peter Thomas, Ngonidzashe Marongwe, 2021-05-19 One of the oldest survival pursuits undertaken by the weak and the downtrodden people across the world has been begging. Going back to the ancient Christian biblical times up to the present epoch as well as across varying spatial settings in situations of trouble and tribulations, parts of various communities have resorted to beggary to either overcome immediate adversities or longer term calamities. Drawing on insights from two polar theoretical lenses of Social Constructionism and Social Deconstructionism and guided by a pithy study of the begging across the African continent especially by Zimbabweans, this book troubles the various contours related to the subject of begging. Inter alia, the book considers the concept of begging, the causes of the prevalence of begging across the world and particularly among Zimbabweans, the challenges and benefits associated with the pursuit of alms, the impact of begging in foreign lands as well as some of the strategies that beggars employ to maximize their collections and/or profits. What can be discerned from the book is that for many, begging is one of the last resort undertakings with low pickings. However, from a utilitarian perspective, begging has helped to sustain the impoverished livelihoods of Zimbabweans both inside and outside the borders of the country since the advent of a debilitating crisis experienced from the turn of the new millennium. On the whole, this book seeks to provoke further researches on an important socio-economic area that affects many African communities but has so far been scantily researched. The book is handy for students and practitioners in economic history, African studies, economics, risk and disaster management, social anthropology, political science and development studies.

Reimagining God and Resacralisation Alexa Blonner, 2019-05-14 This book shows that widespread resacralisation has been taking place, which is producing new ways of perceiving God and the divine. The last century has seen unmistakable changes in religious practices and the concept of spirituality right across the world. There was a broad expectation for much of the twentieth century that religious worldviews would eventually succumb to the challenge of secularist materialism, but this process of secularisation has yet to occur as predicted. The book begins by contrasting theories of secularisation and resacralisation. Throughout the book, conceptual threads or new religious themes related to this resacralisation are discussed in terms of three main categories: reimagining God's nature, substance and location; reimagining human value and purpose; and reimagining modes of redemption. Finally, the book considers how these threads are moving in various different directions and what the religious future might hold. This is a bold examination of contemporary spirituality that will appeal to academics and scholars of religious studies, new religious movements and the sociology of religion.

Bureaucracy, Law and Dystopia in the United Kingdom's Asylum System John R. Campbell, 2016-12-01 The central concern of this book is to find answers to fundamental questions about the British asylum system and how it operates Based on ethnographic research over a two year period the work follows and analyses numerous asylum appeals through the British courts It draws on myriad interviews with individuals and a thorough examination of many state and non state organizations to understand how the system works While the organization of the book reflects the formal asylum process a focus on specific legal appeals reveals the political factors at play as different institutions and actors seek to influence judicial decision making

and overturn uphold official asylum policy The final chapter draws on the author s ethnographic findings of the UK s asylum field to re examine research on the Refugee Determination System in the US Canada and Australia which has narrowly focused on judicial decision making It argues that analysis of Refugee Determination Systems must be situated and studied as part of a wider political semi autonomous asylum field which needs to be better understood Providing an in depth ethnographic study of a national asylum system and of immigration law and practice the book will be an invaluable resource for academics researchers and policy makers in the UK and beyond working in this highly topical area
