Royal Artillery: Glossary of Terms and Abbreviations Philip Jobson, 2016-09-02 Since its creation in 1716 the Royal Artillery has been a cornerstone of the British Armed Forces as their motto Ubique Everywhere implies In this book Philip Jobson has collated the enormous and complex artillery lexicon which has accumulated since that day as dynamic as its subject to keep pace with technical and tactical innovation The development of indirect fire counter battery anti tank and anti aircraft fire all required a novel vocabulary as did advances in survey and locating Changes in communication from shouts to flags to line to radio to compressed data transmission all left their mark on the language Epic in scope and detail even the most expert Gunner would be likely to fail an unseen test based on this work It will therefore be a pleasure to those who think themselves expert to browse this volume and will serve as an invaluable reference for historians and researchers to ensure that they use the correct term and understand its true meaning Zonal Biomes of Southern Africa Ladislav

Mucina, Michael C. Rutherford, 2024-09-28 This book is the first comprehensive account of large scale ecosystems biomes of Southern Africa defined as area south of the Kunene and Zambezi Rivers It addresses the diversity of biomes in one of the most biodiverse regions of the world comprising South Africa Namibia Botswana Zimbabwe southern part of Mozambique Eswatini and Lesotho It has adopted a novel hierarchical biome classification approach The biomes at four levels of complexity are identified described and mapped using modern GIS assisted mapping technology The structure of the book and its comprehensive nature makes this product of prime interest to teachers and students of all tertiary education levels as well as to scientists in the fields of ecology biodiversity science and bioclimatology It is poised to serve as a major reference book and handbook for the users in these scientific fields *Wallace's Year-book of Trotting and Pacing in ...* John Hankins

Wallace, 1913 **Interfaces to Database Systems (IDS92)** Richard Cooper, 2012-12-06 Despite the volume of research carried out into the design of database systems and the design of user interfaces there is little cross fertilization between the two areas The control of user interfaces to database systems is therefore significantly less advanced than other aspects of DBMS design As database functionality is used in a wider range of areas such as design applications the suitability of the user interface is becoming increasingly important It is therefore necessary to begin applying the knowledge developed by HCI researchers to the specialised domain of database systems This volume contains revised papers from the International Workshop on Interfaces to Database Systems held in Glasgow 1 3 July 1992 The workshop aimed to develop an interaction between the design of database systems and user interfaces It discussed both the production of interfaces tailored to particular applications and also more general systems within which interfaces can be developed Some of the papers concentrate on usability aspects some discuss different interface metaphors whilst others tackle the question of designing a general conceptual model The latter topic is of particular importance as it is only by achieving an abstract model of what the user understands to be in the database that the data can be associated with appropriate interface facilities Among the

contents of the volume are integrated interfaces to publicly available databases database query interface for medical information systems an integrated approach to task oriented database retrieval interfaces GRADI a graphical database interface for a multimedia DBMS cognitive view mechanism for multimedia information systems a graphical schema representation for object oriented databases a conceptual framework for error analysis in SQL interfaces a browser for a version entity relationship database Interfaces to Database Systems IDS92 is unique in that it brings together a variety of approaches from the database and HCI research communities It will provide essential reading for researchers of database systems and also industrial developers of DBMS

My Road to Radio and The Vocal Scene George Jellinek, 2015-01-09 Born in Ujpest Hungary in 1919 George Jellinek began his musical career playing violin with gypsies in the family's garden restaurant He spent his adolescence doing much the same honing his talent and enriching his own musical education with frequent trips to the Hungarian Royal Opera House But when Hitler and Chamberlain signed the Munich Pact in 1938 Jellinek's quiet life was shattered How the exiled teenager survived World War II worked his way up from a poor Hungarian immigrant in Cuba and became one of the most important and influential musical administrators in New York is an unconventional but truly American success story This memoir documents the inspiring life of George Jellinek beginning with his childhood in his beloved Hungary The crisis of World War II soon invaded his life and leaving behind his family and homeland he fled west Having been finally allowed to enter the United States he was drafted into the U S Army in 1942 obligated to bear arms against the country of his birth This ironic turn of events culminated in his firsthand role in the capture of Ferenc Szalasi the leader of Hungary's Hitlerite faction The latter half of the book reveals how music helped Jellinek piece back together his broken life in America After rising to the post of musical director for radio station WQXR he went on to become the producer and host of The Vocal Scene His 36 years with that program established it as a revered fixture of New York's opera life The epilogue documents the day on which Hungary's president bestowed upon Jellinek the Knight's Cross of the Order of Merit of the Republic of Hungary

Vision in Cephalopods Frederike Diana Hanke, Daniel Colaco Osorio, 2018-03-13 Cephalopods usually have large and mobile eyes with which they constantly scan their environment The eyes of cephalopods are single chamber eyes which show resemblance to vertebrate eyes However there are marked differences such as the cephalopod eye having an everted retina instead of an inverted retina found in vertebrates Their visual system allows the cephalopods depending on species to discriminate objects on the basis of their shapes or sizes images from mirror images or to learn from the observation of others The cephalopod visual system is also polarization sensitive and controls camouflage an extraordinary ability almost exclusive to all cephalopods they are capable of rapidly adapting their body coloration as well as altering their body shape to any background in almost any condition and even during self motion Visual scene analysis ultimately leads to motor outputs that cause an appropriate change in skin coloration or texture by acting directly on chromatophores or papillae in the skin Mirroring these numerous functions of the visual system large parts of the cephalopod brain are devoted to the processing of visual information This research topic focuses on current advances in the knowledge of cephalopod vision It is designed to facilitate merging questions approaches and data available through the work of different researchers working on different aspects of cephalopod vision Thus the research topic creates mutual awareness and facilitates the growth of a field of research with a long tradition cephalopod vision visual perception and cognition as well as the mechanisms of camouflage This research topic emerged from a workshop on Vision in cephalopods as part of the COST Action FA1301
