In contrast to the talk shows of the eighties and nineties where modest transformation was discussed as an ideal advances in technology combined with changing tastes and demands of viewers have created an appetite for dramatic transformations This volume presents case studies from across the lifestyle genre considering a variety of themes but with a shared understanding of the self as an evolving project driven by enterprise Written by an international team of scholars the collection will appeal to sociologists of culture and consumption as well as to scholars of media studies and media production throughout the world
