museums past and present showing how they display the human body whether naked stripped of skin completely dissected or rendered in the form of drawings three dimensional models x rays or films She identifies within anatomy museums a diverse array of related issues from the representation of deceased bodies in art to the aesthetics of science from body donation to techniques for preserving corpses and ritualized practices for disposing of the dead Probing these matters through in depth study Anatomy Museum unearths a strange and compelling cultural history of the spaces human bodies are made to occupy when displayed after death
