

**WebFOCUS drilldowns** support the execution of parameter-driven procedures that return information to the client based on user selection within a report.

**For Office reports, it's a matter of security:**

- With the enhanced WebFOCUS Repository security features, user requests require credentials.
- When a report is opened these credentials are maintained in the browser and NOT passed to the Office application.
- Without these credentials, the drilldown request can not get back into WebFOCUS to execute.
