This practical guide for teaching philosophy brings together essays by two dozen distinguished philosophers committed to pedagogy. Addressing primarily practical issues such as how to motivate students, construct particular courses and give educational exams, the essays also touch on theoretical issues such as whether moral edification is a proper goal of teaching ethics. An excellent sourcebook for graduate students just learning to teach as well as for professors searching for new strategies and inspiration or called upon to teach courses outside of their specialties. **Bulletin**, 1970 Introduction to Computer Systems John A. Aseltine, 1989-10-02

The objective of this text is to provide a basis for the development of computer understanding as needed for further study in information systems and related areas. It is directed principally toward individuals who have not had formal exposure to computer understanding which is now characteristic of undergraduate education in computer science, electrical engineering or systems engineering. The 1984 Guide to the Evaluation of Educational Experiences in the Armed Services American Council on Education, 1984 *A Third Survey of Domestic Electronic Digital Computing Systems* Martin H. Weik, 1961

Based on the results of a third survey, the engineering and programming characteristics of 222 different electronic digital computing systems are given. The data are presented from the point of view of application, numerical and arithmetic characteristics, input/output and storage systems, construction and checking features, power, space, weight and site preparation and personnel requirements, production records, cost and rental rates, sale and lease policy, reliability, operating experience and time availability, engineering modifications and improvements and other related topics. An analysis of the survey data, fifteen comparative tables, a discussion of trends, a revised bibliography and a complete glossary of computer engineering and programming terminology are included. *The 1980 Guide to the Evaluation of Educational Experiences in the Armed Services: Army* American Council on Education, 1980 **Master Scheduling in the 21st Century** Thomas F.
