Wilderer, Martin Grambow, 2015-12-11 The authors of this book who represent a broad range of scientific disciplines discuss the issue of centralized versus decentralized control and regulation in the context of sustainable development. The stability and resilience of complex technical economic societal and political systems are commonly assumed to be highly dependent on the effectiveness of sophisticated mainly centralized regulation and control systems and governance structures respectively. In nature however life is mainly self regulated by widespread mainly DNA encoded control mechanisms. The fact that life has endured for more than 2.4 billion years suggests that for man made systems decentralized control concepts are superior to

centralized ones The authors discuss benefits and drawbacks of both approaches to achieving sustainability providing valuable information for students and professional decision makers alike *ICICKM2014-Proceedings of the 11th International Conference on Intellectual Capital, Knowledge Management and Organisational Learning* Jim Rooney,2014-10-17 These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital Knowledge Management Organisational Learning ICICKM 2014 which this year is being held at The University of Sydney Business School The University of Sydney Australia The Conference Co Chairs are Dr John Dumay from Macquarie University Sydney Australia and Dr Gary Oliver from the University of Sydney Australia The conference will be opened with a keynote by Goran Roos Advanced Manufacturing Council Adelaide Australia who will address the topic of Intellectual capital in Australia Economic development in a high cost economy The second day will be opened with a from James Guthrie University of Sydney Australia on the topic of Intellectual Capital and the Public Sector Research Past Present and Future **Dilemmas of hydropower development in Vietnam** Ty Pham Huu,2015-01-13 Hydropower is one of the biggest controversies in Vietnam in recent decades because of its adverse environmental and social consequences especially negative impacts on displaced people who make way for hydropower dam construction This book explains the controversies related to hydropower development in Vietnam in order to make policy recommendations for equitable and sustainable development The book focuses on the analysis of emerging issues such as land acquisition compensation for losses displacement and resettlement support for livelihood development and benefit sharing from hydropower development The analysis emphasizes the role of different stakeholders in the decision making process for hydropower development in Vietnam as a means to find a better governance model *The Capability Approach and Sustainability* Ortrud Lessmann,Felix Rauschmayer,2016-03-16 This is the first book dedicated exclusively to the question of the relationships between sustainability and the capability approach It is rather astonishing that the issue of sustainability first posed by the Brundtland commission in 1987 has gained so little attention from capability scholars despite the approach s focus on human well being This book starts with a seminal contribution by Sen on the Ends and Means of Sustainability delivered as a keynote in 2000 All contributions to the book focus on the difficulties that arise from a freedom oriented view of sustainability they argue for taking note of the impact of human life on nature they question the meaning of intergenerational justice when measured in the currency of substantive freedoms capabilities they raise the issue of collective responsibility and suggest ways to model and operationalize the capability approach to sustainable development The book presents the state of the art concerning The capability approach and sustainability while admitting that it is only a first contribution to a growing field that deserves our attention Defining what is to be sustained and asking how it can be sustained This book was published as a special issue of the Journal of Human Development and Capabilities **Precious Forests** Miodrag Zlatic,2015-09-30 Forests are the dominant terrestrial ecosystem of Earth They are distributed across the globe Forests

Design Development Gabriel Patrocínio, José Mauro Nunes, 2019-10-10. The subject of Design Policies is slowly growing to be broadly discussed although most of the time from within a design practitioners and design enthusiasts bubble. Public administration is gradually embracing design from another perspective using Design Thinking to develop programmes and services. Lawmakers and government executives are still distant, frequently without a real knowledge of design and its potential. Governments and designers as well seem to be contented by design promotion actions or programmes which are frequently wrongly accepted as a design policy. From this prospect, this book intends to be a contribution to the debate of Design Policies, nourished by past experiences and reflections but also from current practices as in Europe and China, for example. The book was originally meant in hindsight of a document produced in the seventies by the United Nations Industrial Development Organization (UNIDO) within the context of a partnership with the International Council of Societies of Industrial Design (ICSID). This partnership resulted in a document discussing design as a driver of

economic growth prepared by Gui Bonsiepe in 1973 and then summarized by the UNIDO Secretariat in 1975 as the Basic guidelines for policy of industrial design in developing countries Both documents were made available for this book by UNIDO and are reproduced here as appendices Although originally aimed at developing countries after these four decades of unsettling growth of wicked problems this theme deserves to be reviewed and discussed thoroughly Design might play a very significant role when approaching contemporary problems such as rearranging urban spaces urban mobility tourism immigration housing violence and environment among others These not so new wicked problems prompts to a whole new perspective on design and public design policies that goes beyond the original context here The perspective of the Third World economy as it was known at the time might offer insights to understand and perhaps solve problems of any size economy especially if we consider the aspects of local or regional problems It is time to exercise empathy towards someone else s problems and to reflect under different scales and measures and design seem to be the perfect instrument for it Mugendi M Rithaa former President of ICSID currently the WDO World Design Organization saluted the book as the most important contribution on this field in the last ten years cited in the final remarks of his interview in the chapter Design in Africa I participate therefore I am In Brazil the book was awarded twice initially at the Objeto Brasil International Design Award in May 2016 and then later at the same year at the MCB Museum of the Brazilian Home Design Awards of 2016 The jury of this later has acclaimed the book as a theoretical and academic milestone with potential to change the current practice and understanding of Design After the successful launch in Portugal with conferences in three design schools in 2016 the book was selected in 2017 to the exhibition Brasil Hoje at MUDE Lisbon s Museum of Fashion and Design The curator Frederico Duarte highlighted in the catalogue The first and indispensable book on design and development in the Portuguese language In 2018 the book was selected in Spain to be part of BID the Ibero American Design Biennial in Madrid In the same year was published an e book edition in Portuguese to make it more accessible at the same time that this first English edition started being prepared Marketing Brands in Africa Samuelson Appau, 2021-09-11 This contributed volume serves as an authoritative reference and guide for anyone looking to study or build a brand in Africa Despite being touted as the last frontier of global brands very little research exists that examines brands and branding in this emerging market Authors cover crucial topics such as the history of branding in Africa branding approaches used by start ups religious organizations political parties and businesses in the informal economies of Africa as well as marketing Africa as a brand using practical cases empirical and critical approaches With the world s youngest population and the second fastest growing economies Africa has quickly become a hotbed for marketing and consumption of local and global brands While past research has mostly focused on examining the brand image of Africa and African countries or on branding Africa as a place for tourist consumption what is missing is a comprehensive guide that discusses the theory and practice of branding and brands in and from Africa Through theoretical and practical contributions the authors of this book seek to fill the knowledge gap about
