We Are In A Book Illinois School Library Media Association:

Briefing and Open Forum on Children and Youth Services, 1993 School Libraries 3.0 Rebecca P. Butler, 2015-06-18

This textbook for school library administration courses is written by a professor who has taught this course at least once a year for the past twenty years. Technology is interwoven throughout the book and not listed as a separate chapter or book section. This is because the school librarian of today and certainly the school librarian of tomorrow is working in an environment of web resources, multimedia, mixed methods, and varying programs and services. Major chapters cover the various roles of the school librarian, curricular standards and guidelines, policies and procedures, budgeting, facilities, personnel services, programming, ethics, advocacy, and evaluation. Sample policies, procedures, and plans make this book valuable to both new and experienced school librarians. **Censored** Matthew Fellion, Katherine Inglis, 2017-09-05. When Henry Vizetelly was imprisoned in 1889 for publishing the novels of Émile Zola in English, the problem was not just Zola's French candor about sex; it was that Vizetelly's books were cheap and ordinary people could read them. *Censored* exposes the role that power plays in censorship. In twenty-five chapters focusing on a wide range of texts including the Bible, slave narratives, modernist classics, comic books, and Chicana/o literature, Matthew Fellion and Katherine Inglis chart the forces that have driven censorship in the United Kingdom and the United States for over six hundred years, from fears of civil unrest and corruptible youth to the oppression of various groups: religious and political dissidents, same-sex lovers, the working class, immigrants, women, racialized people, and those who have been incarcerated or enslaved. The authors also consider the weight of speech and when restraints might be justified. Rich with illustrations that bring to life the personalities and the books that feature in its stories, *Censored* takes readers behind the scenes into the courtroom battles, legislative debates, public campaigns, and private exchanges that have shaped the course of literature. A vital reminder that the freedom of speech has always been fragile and never enjoyed equally by all, *Censored* offers lessons from the past to guard against threats to literature in a new political era. *Illinois Libraries*, 1994. Includes proceedings of the Illinois Library Association.

Growing Schools Debbie Abilock, Kristin Fontichiaro, Violet H. Harada, 2012-06-11. Presenting examples of school librarians leading professional learning in numerous contexts and for diverse learning goals with remarkable success, this book will inspire other practitioners to initiate and refine professional learning in their schools and districts. School administrators are recognizing that school librarians are ideal to lead professional development because they service the entire school network, from the students and faculty to families and the community. As a national downturn in educational funding is diminishing districts' ability to optimally staff libraries, investing energy in professional development is a sound strategy to bring information literacy skills to every student, especially in buildings with part-time librarians or districts with only a single librarian of record. *Growing Schools: Librarians as Professional Developers* stands apart from other works as the first book that directly addresses the potential role of the school librarian as a staff developer. Within the chapters, the

authors relate their professional development journeys collectively representing experience within K 12 public and private institutions district and regional units and universities across the United States and Canada The work provides various approaches to professional development with a range of processes and techniques that have been proven effective in different contexts and in achieving diverse learning goals Practitioners at the building and district levels as well as school principals state and district personnel and library educators will find this book insightful and instructive
