Monitoring American Federalism Christian G. Fritz, 2023-01-26 *Monitoring American Federalism* examines some of the nation's most significant controversies in which state legislatures have attempted to be active partners in the process of constitutional decision making Christian G Fritz looks at interposition which is the practice of states opposing federal government decisions that were deemed unconstitutional Interposition became a much used constitutional tool to monitor the federal government and organize resistance beginning with the Constitution's ratification and continuing through the present affecting issues including gun control immigration and health care Though the use of interposition was largely abandoned because of its association with nullification and the Civil War recent interest reminds us that the federal government cannot run roughshod over states and that states lack any legitimate power to nullify federal laws Insightful and comprehensive this appraisal of interposition breaks new ground in American political and constitutional history and can help us preserve our constitutional system and democracy

Folk Engineering Stephen J. Ramos, 2025-10-03. During the interwar years the discourse of regional planning profoundly reformulated the spatiality of race and place in the United States. In the South Jim Crow brutality and agricultural crisis fueled unprecedented population outmigration. Sociologist and author Howard W. Odum founded the Institute for Research in Social Science at the University of North Carolina to develop a Southern regionalism that reasserted organic territorial culture amid that flux. Regionalism connected the arts, humanities and social sciences across the country in a collective effort to elevate place based narrative and folk sensibility to an all encompassing social theory. Stephen J. Ramos refocuses the history of US regionalism and regional planning on the South, illuminating the modern tensions inherent in regionalism as nostalgic cultural practice paired with future oriented planning ideology. By tracing Southern regionalists' intellectual history and institutional biography, Ramos explores how they developed a regional nationalism through surveying and planning that came to inspire federal New Deal policies for the South. In showing how Odum's influence crossed various borders, Ramos offers us a nuanced way to reappraise race, social science and planning in the US South.
