SAP Webi - Overview

Web Intelligence is part of SAP BusinessObjects product suite and is used for analytical and ad hoc reporting to meet an organization's business requirements. Web Intelligence is a Business Intelligence reporting tool for business users to analyze data in Data Warehouse. It assists business managers in the decision-making process for building future strategies.

Using Web Intelligence, business users can create basic, medium, and complex reports from transactional data in database and by creating Universes using Information Design Tool/UDT. Various SAP and non-SAP data sources can be used to create reports in Web Intelligence. SAP Business Warehouse (BW) system doesn't require a Universe to connect to Web Intelligence tool.

Web Intelligence tool can work as a client tool of BusinessObjects platform and also as a standalone tool for reporting.

Versions and History

BusinessObjects was first started in 1990 with the tool name Skipper SQL 2.x, and in the year 1994 Business Objects v3.0 was launched.

In 2005, BO XI was released and later on various other versions introduced. Some of the versions are –

- BO XI R1
- BO XI R2
- BO XI R3
- BO XI R3.1
- BO XI R3.2

In 2007, SAP acquired this company for \$6.8 billion and the product has been renamed as **SAP BusinessObjects**.

Later in the year 2011, BO XI 4.0 was introduced. The latest version of the tool is SAP BO 4.2.

number of employment discrimination suits that can be brought by reversing the Supreme Court's decision that the timing rules for lawsuits begin when an allegedly discriminatory practice is adopted. The Supreme Court extended its string of pro arbitration cases by ruling in *14 Penn Plaza LLC v. Pyett* 129 S. Ct. 1456 (4/1/09) that a collective bargaining agreement clause that clearly obligates union members to arbitrate ADEA claims is enforceable. The Supreme Court held that federal labor law preempts a California law that forbade employers that receive state contracts or other funding to discuss union matters with employees. As long as employers avoid coercion, federal law seeks to promote wide open debate on labor issues.

Chamber of Commerce v. Brown 128 S. Ct. 2408 (2008). Another Supreme Court ruling discussed allows unions to charge non members who pay agency fees in lieu of joining the union amounts representing certain expenses of national litigation.

Enterprise Information Systems Joaquim Filipe, José Cordeiro, 2009-04-03. This book contains the best papers of the 10th International Conference on Enterprise Information Systems ICEIS 2008 held in the city of Barcelona, Spain, organized by the Institute for Systems and Technologies of Information Control and Communication INSTICC in cooperation with AAAI and co-sponsored by WfMC. ICEIS has become a major point of contact between research scientists, engineers, and practitioners in the area of business applications of information systems. This year, five simultaneous tracks were held, covering different aspects related to enterprise computing, including Databases and Information Systems, Integration, Artificial Intelligence, and Decision Support Systems, Information Systems Analysis and Specification, Software Agents, and Internet Computing and Human Computer Interaction. All tracks focused on real world applications and highlighted the benefits of information systems and technology for industry and services, thus making a bridge between academia and enterprise. Following the success of 2007, ICEIS 2008 received 665 paper submissions from more than 40 countries. In all, 62 papers were published and presented as full papers (i.e., completed work, 8 pages), 30 min oral presentations, and 183 papers reflecting work in progress or position papers were accepted for short presentation, and another 161 for poster presentation.

density based smart traffic control and management system - Jun 15 2022

web can optimize the delay when the traffic increases this paper presents a density based traffic light control and monitoring system the system attempts to reduce the likelihood of traffic jams caused by traffic lights to an extent the system is based on an mcs 51 family based at89s52 microcontroller

density based traffic control system using artificial intelligence - Jul 28 2023

web nov 8 2022 density based traffic control system using artificial intelligence r s sabeenian r ramapriya s swetha conference paper first online 08 november 2022 225 accesses part of the lecture notes in networks and systems book series lnn volume 492 abstract

density based smart traffic control system using canny edge - Dec 21 2022

web in this paper a system to control the traffic by measuring the real time vehicle density using canny edge detection with digital image processing is proposed this imposing traffic control system offers significant improvement in response time vehicle management automation reliability and overall efficiency over the existing systems

a dynamic density based traffic control system using iot ssrn - Apr 25 2023

web jul 14 2021 abstract in this paper a system to regulate the traffic with the help of real time vehicle density using haar feature based cascade classifier is proposed based on the traffic densities on all roads the model allocates

smart density based traffic light system ieeexplore - Apr 13 2022

web jun 5 2020 sensors placed adjacent to the road to control the traffic density by changing traffic signal appropriately all ir sensors are interfaced with arduino uno and it reads data from ir sensors traffic signal for the system is designed using leds and each signal consist two leds for each lane

automated real time intelligent traffic control system for smart - Jan 22 2023

web may 9 2020 in this article we propose an intelligent traffic control system based on the design of a wireless sensor network wsn in order to collect data on road traffic and also on available parking spaces in a smart city an intelligent traffic light control system based on density of traffic emerging technology in modelling and graphics

design and construction of density based traffic control system - Aug 17 2022

web oct 16 2019 in this paper a density based auto traffic light control system with gsm based remote override is designed and implemented to in particular eliminate the usual conflicting authority between the

density based traffic control system ijarjset - Aug 29 2023

web problem definition monitoring millions of vehicles in real time traffic every second is time consuming and is a challenging task the traditional traffic control system cannot handle the dynamics and complexities involved with traffic densities today

density based smart traffic control system for congregating traffic - Mar 24 2023

web this paper proposes a system which will measure the traffic based on the density of the vehicles within the particular longitude and latitude this splendid traffic control system offers efficient management of traffic and reliability over the existing systems

a real time density based traffic signal control system ieeexplore - Mar 12 2022

web dec 4 2020 this research proposed an approach to develop an effective real time density based traffic light control system this research consists of two major parts image processing model for capture real time data and ann model for predict the results considering real time data

density based traffic light controller using arduino - Feb 11 2022

web working of density based traffic light controller using arduino the working of the project is divided into three steps if there is traffic at all the signals then the system will work normally by controlling the signals one by one if there is no traffic near a signal then the system will skip this signal and will move on to the next one

pdf density based traffic control researchgate - Jun 27 2023

web aug 30 2016 last updated 20 sep 2023 pdf the project is aimed at designing a density based dynamic traffic signal

sensor based traffic control system springerlink - Jan 10 2022

web apr 3 2020 better traffic management requires traffic signal control based on vehicle density one such technique proposed in this paper finds the solution to traffic flow control depending on the number of vehicles on the lane it has two separate systems to control the traffic flow

density based adaptive traffic control system with opencv - Sep 18 2022

web jun 29 2021 density based adaptive traffic control system with opencv in hassanien a e bhattacharyya s chakrabati s bhattacharya a dutta s eds emerging technologies in data mining and information security

simulation of density based traffic control system using - Nov 20 2022

web apr 15 2023 in this paper we have proposed a density based traffic control system using proteus 7 the rest of the paper has been structured as follows in sect 2 we have discussed the existing literature and in sect 3 we have described our proposed work along with the operational model

density based smart traffic light control system for springer - Oct 19 2022

web may 31 2021 this section deals with a review of previous related work on density based smart traffic light control systems for emergency vehicles naga harsha et al the author lists some of the ways to improve the traditional traffic system some of the methods listed include the usage of infrared sensors ultrasound sensors camera modules inductive

density based traffic control system using arduino ssrn - May 14 2022

web oct 11 2021 this paper is designed to develop a density based traffic controller system using arduino the signal timing changes automatically on sensing the traffic density at the junction the microcontroller used in this project is arduino

density based traffic control with emergency override - Feb 23 2023

web may 19 2018 it allocates equal time slots to each road irrespective of the traffic density this creates unnecessary waiting for drivers which is not possible every time therefore we propose density based traffic control system which allocates different time slots to each road according to vehicle density

density based smart traffic control system - May 26 2023

web sep 1 2020 the goal of this work is to build a density based dynamic traffic signal system in which the signal timing changes automatically dependent on the traffic density at every given
