Contact vs. Non-Contact Forces

Contact forces: forces that result from the physical touching of two objects.

Examples: pushing, pulling, friction, normal force, tension, spring force.

Non-Contact forces: forces that can act over a distance and even through space in the absence of touching. Examples: gravity, magnetic, electrical.

WEIGHTLESSNESS IN ORBIT

F_{contact} is the contact force

$F_{\text{non-contact}}$ is the non-contact force.

Weightlessness can't be
achieved in the same
sense as we
achieve it because
weight comes from
our sensing of the
counter-acting
contact force.
