Aircraft Maintenance Optimization and Applications presents flexible and cost effective maintenance schedules for aircraft
structures particular in composite airframes By applying an intelligent rating system and the back propagation network BPN
method and FTA technique a new approach was created to assist users in determining inspection intervals for new aircraft
structures especially in composite structures This book also discusses the influence of Structure Health Monitoring SHM on
scheduled maintenance An integrated logic diagram establishes how to incorporate SHM into the current MSG 3 structural
analysis that is based on four maintenance scenarios with gradual increasing maturity levels of SHM The inspection intervals
and the repair thresholds are adjusted according to different combinations of SHM tasks and scheduled maintenance This
book provides a practical means for aircraft manufacturers and operators to consider the feasibility of SHM by examining
labor work reduction structural reliability variation and maintenance cost savings Presents the first resource available on
airframe maintenance optimization Includes the most advanced methods and technologies of maintenance engineering
analysis including first application of composite structure maintenance engineering analysis integrated with SHM Provides
