### Standardized Evaluation Guidelines (SEGs)

The Standardized Evaluation Guidelines (SEGs) define the competency levels for all required performance categories and any agency-specific requirements. The SEGs are intended to provide a fair and uniform scoring method to assess each trainee's progress. It is through the use of these guidelines that the field training program achieves a recognized level of standard, competency, and credibility.

---

#### Overview

Throughout the Field Training Program, the FTO rates the trainee's performance. Each observed behavior is rated using the **Daily Observation Report (DOR)** described in [Appendix 2](#) in the FTP Guide. The rating scales can be scored in two ways: the **Numeric Scale (1–7)** or the **NICS Scale (NI–Needs Improvement/C–Competent/S–Superior)**. The numeric scale offers more flexibility to rate behaviors on a sliding scale between 1 and 7. The NICS scale provides a more direct scoring method. Agencies decide which method best meets their particular training approach.

A rating of "1" or "N/I" indicates the observed behavior is *Unacceptable* or *Needs Improvement*, a rating of "4" or "C" meets the **minimal** standard of *Acceptable* or *Competent*, and "7" or "S" indicates the trainee's performance is at a *Superior* level.

Any rating of "1" or "7" on the numeric scale or "N/I" or "S" on the NICS scale **requires** a Documented Situation (DS) to describe the event which resulted in the observed rating. The FTO fills out the **Narrative Evaluation** portion of the DOR to document the event (see [Appendix 2](#)).

The following SEGs correspond to the numbered observable behaviors listed in the DOR for each performance category. Use these value definitions when rating a trainee's level of performance.

---

#### Performance Categories

##### ATTITUDE

##### 1. Acceptance of Feedback/FTO/FTP

Evaluates the way the trainee accepts criticism, how the trainee interacts with the FTO, and how the trainee accepts the training program, including how the FTO's feedback is received and used to further learning and improve performance.

- |          |   |
|----------|---|
| 1 or N/I | <i>Unacceptable</i> – Rationalizes mistakes. Denies that errors were made. Is argumentative. Refuses to, or does not attempt to, make corrections. Considers criticism a personal attack. |

| 7 or S   | <i>Superior</i> – Actively solicits criticism/feedback in order to further learning and improve performance. Does not argue or blame other persons/things for errors.                     |

**evaluation guide for low- and middle-income countries** Anne M. Hayes, Eileen Dombrowski, Allison H. Shefcyk, Jennae Bulat, 2018-04-29 Learning disabilities are among the most common disabilities experienced in childhood and adulthood. Although identifying learning disabilities in a school setting is a complex process, it is particularly challenging in low and middle income countries that lack the appropriate resources, tools, and supports. This guide provides an introduction to learning disabilities and describes the processes and practices that are necessary for the identification process. It also describes a phased approach that countries can use to assess their current screening and evaluation services, as well as determine the steps needed to develop, strengthen, and build systems that support students with learning disabilities. This guide also provides intervention recommendations that teachers and school administrators can implement at each phase of system development. Although this guide primarily addresses learning disabilities, the practices, processes, and systems described may be also used to improve the identification of other disabilities commonly encountered in schools. **An**

Njoroge, 2019-04-02 This book provides a clinical guide to the psychiatric assessment of infants and young children birth through five years and their families. It offers a comprehensive, data-rich framework for conducting mental health assessments of infants, toddlers, and preschoolers. The book includes a step-by-step guide for evaluation and assessment, reviewing relevant literature, and best practices for working with very young children. It begins with an overview of the purpose and principles of psychiatric assessment and offers a protocol for planning and executing a thorough evaluation. Chapters examine critical aspects of the assessment process, including children's relationships with parents, caregivers, assessment of parents, cultural considerations, and play behaviors. Chapters also provide illustrative case vignettes and information on specialized tools that can be adapted for use in a private office or training clinic. Topics featured in this book include play-based assessment models for accessing the inner world of young children, the effect of caregivers and their reflective functioning on the mental health of young children, the use of adult report rating scales in the clinical assessment of young children, psychopharmacologic considerations in early childhood, and The Clinical Guide to Psychiatric Assessment of Infants and Young Children is a must-have resource for researchers, clinicians, and related professionals and graduate students in infancy and early childhood development, pediatrics, social work, psychiatry, and public health. The volume is both highly practical and up-to-date, impressively bridging the gap between science and practice. The book is an invaluable guide for students and trainees and an important reference for seasoned clinicians. David Oppenheim, Ph.D., University of Haifa.
