Better Teachers, Better Schools Valerie Hill-Jackson, Delia Stafford, 2017-02-01 We all know teachers who in the face of insurmountable district and school level challenges inspire underserved students to succeed These teachers are more than good they are stars Haberman maintains that school districts still gamble when selecting teachers as an overwhelming number are not stars and are unprepared or underprepared to work effectively with marginalized students Haberman explains that teacher selection is more important than teacher training The ability to identify educators with the necessary social justice or relational characteristics may lead to an increase in academic achievement among learners as well as lower teacher attrition Consequently all those who are interested in building America s teaching force with stars including human resource managers for K 12 school districts administrators teachers teacher advocates teacher education faculty and graduate students will benefit from this book Better Teachers Better Schools is a must read for two main reasons First the achievement gap between 16 million children in poverty and their mainstream counterparts is continuing to become even wider Many urban students are constantly subjected to educational barriers which limits their future opportunities These learners deserve teachers that know more than content but who can build relationships in order to leverage learning with greater outcomes Second Haberman was one of the most prolific producers of teachers to date He reminds us that quality school systems built on the back of quality teachers benefit our society Better Teachers Better Schools offers a refreshing take on what it means to be a star teacher by sharing some of Haberman s most requested writings as well as new narratives
