McComiskey, 2019-11-11 This fresh assessment of covenant theology may represent the first book length examination of the structural relationships of the Old Testament covenants Tremper Longman a professor of Old Testament at Westminster Theological Seminary describes The Covenants of Promise as a marvelously written and profound book which deals with some of the most crucial issues in biblical theology The significance of The Covenants of Promise writes the author is in its application of the structure of the covenants to biblical theology The division of the Old Testament covenants into the categories promissory and administrative is unique in the literature on the covenants This complex bi covenantal structure within which God disposes of the inheritance promised to his people becomes discernible in the biblical text through a sound application of proper exegetical theology The textual evidence leads one to question the way some tenets of traditional covenant theology have been expressed but not the tenets themselves The author first explores the promise in its Old and New Testament settings He deals with the way in which the promise is expressed in the major covenants devoting

considerable space to the law in the teachings of Jesus and Paul Next he argues that the promise covenant is eternally valid and that circumcision the law and the new covenant are administrative covenants Finally he examines the implications of this structure for biblical theology Selected topics are the redemptive relationship between Father and Son the covenant of works law and grace and the relationship between the testaments The End of the World and Other Teachable Moments Michael Naas, 2014-10-15 A Derrida scholar traces the evolution of the philosopher's final seminar in Paris as he contemplates the state of the world and his own mortality For decades philosopher Jacques Derrida held weekly seminars in Paris spending years at a time on a single complex theme From 2001 to 2003 he delivered the final work in this series entitled The Beast and the Sovereign As this final seminar progressed its central theme was diverted by questions of death mourning memory and especially the end of the world Now philosopher and Derrida scholar Michael Naas takes readers through the remarkable itinerary of Derrida's final seminar in The End of the World and Other Teachable Moments The book begins with Derrida's analyses of the question of the animal in the context of his other published works on that subject It then follows Derrida as a very different tone begins to emerge one that wavers between melancholy and extraordinary lucidity with regard to the end of life Focusing the entire second year on Daniel Defoe's novel Robinson Crusoe and Martin Heidegger's seminar The Fundamental Concepts of Metaphysics Derrida explores questions of the end of the world and of an originary violence that is both creative and destructive The End of the World and Other Teachable Moments follows Derrida from week to week as he responds to these emerging questions as well as to important events unfolding around him both world events the aftermath of 9 11 the American invasion of Iraq and more personal ones from the death of Maurice Blanchot to intimations of his own death less than two years away The Christian and the Old Testament Walter C.
