climbing a mountain just maybe more treacherous I say this as I have spent years as a backpacker and entrepreneur While
hiking through the Alaskan Tundra I feared brown bears and crevasses Yet nothing prepared me for the responsibility of
payroll for over 200 families relying on my business plan to feed their children Unlike traditional software the mere smell of
hardware sensors and robot gearing sends shivers through most investors with red flags arising from the perceived capital
inefficiencies and intense research and development This is coupled with a high talent requirement before launching even a
minimum viable product as these inventions demand a cross section of skills mechanical electrical and software engineering
To set out on the trail of uncrewed success machine inventors and founders require a detailed field guide to meet customer
demand and financing objectives My goal for this book is to help you at a pivotal point in your ideation process and at the
same time introduce you to a cadre of potential mentors Through interviews with some of the most respected luminaries in
this field I aim to help fortify your resolve to follow your passions and build a billion dollar company The chapters of this book
have been organized like a field guide as if you are setting out on a trip in the wild Just like it's essential to satiate yourself
