Vehicles and Public-Private Partnerships in China Hui Jin,Isabel Rial,2016-09-21 In this paper we argue that there is much room for China to strengthen its regulatory framework for public private partnerships PPPs We show that infrastructure projects carried out through local government financing vehicles LGFVs were largely unregulated PPPs and significant fiscal risks have already manifested themselves While PPPs can potentially provide efficiency gains they can also be used by governments to circumvent budgetary borrowing constraints Therefore effective PPP regulation is key to

delivering PPPs benefits while containing their potential fiscal risks The authorities have taken concrete steps in order to establish a sound regulatory framework and foster a new generation of PPPs However to make the framework effective we highlight a few issues to be resolved Based on international best practice we propose a four pillar regulatory framework for China which could be implemented gradually in three stages **Development on Loan** Nicholas Loubere,2025-10-01 Key to China s plans to promote rural development is the de marginalisation of the countryside through the incorporation of rural areas into the urban based market oriented financial system For this reason Chinese development planners have turned to microcredit i e the provision of small scale loans to financially excluded rural households as a means of increasing financial consciousness and facilitating rural de marginalisation Drawing on in depth fieldwork in rural China this book examines the formulation implementation and outcomes of government run microcredit programmes in China illuminating the diverse roles that microcredit plays in local processes of socioeconomic development and the livelihoods of local actors It details how microcredit facilitates de marginalisation for some while simultaneously exacerbating the marginalisation of others and exposes the ways in which microcredit and other top down development strategies reflect and reinforce the contradictions and paradoxes implicit in rural China s contemporary development landscape *Managing Local Government* Kimberly L. have managed to gain explanatory power over reality nor can they solve real life problems This book proposes a new macroeconomic paradigm that makes breakthroughs in these areas Based on a balance sheet approach and macro financial linkage analysis this book carries out a comprehensive analysis of the trends within China s macroeconomy in 2020 The author argues that the COVID 19 pandemic created a great degree of uncertainty therefore supply side structural reform and improved total factor productivity have been promoted to ensure a policy of steady growth Given the declining economic growth rate in percentage terms China has needed to adapt to a moderate increase in the leverage ratio while applying more effective fiscal policies to achieve a dynamic balance between stable growth and risk prevention Scholars and students of economics and finance especially Chinese economics will find this book a useful reference **United States Code 2012**

Yuhong Zhao,2021-06-17 Analysis of Chinese environmental law with a focus on the development in statutory regulation institution building and judicial innovation **The UK Regional-National Economic Problem** Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in

the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
